TO: Public Libraries, Interested Agencies, Organizations and Individuals

The Metropolitan Transportation Commission has released the Draft 2013 Transportation Improvement Program (TIP) and Draft Transportation-Air Quality Conformity Analysis for Plan Bay Area and the 2013 TIP for public comment. The comment period starts Friday, March 29, 2013 and ends on Friday, May 3, 2013 at 4:00 p.m.

The federally required Transportation Improvement Program (TIP) is a comprehensive listing of surface transportation capital projects for the nine-county San Francisco Bay Area that receive federal funds, are subject to a federally required action or are regionally significant. The MTC, as the federally designated Metropolitan Planning Organization (MPO) for the San Francisco Bay Area region, prepares and adopts the TIP at least once every four years. The TIP covers a six-year period and must be financially constrained by year, meaning that the amount of dollars committed to the projects (also referred as programmed) must not exceed the amount of dollars estimated to be available. The Draft 2013 TIP includes projects programmed over six fiscal years from FY 2012-13 through FY 2017-18. The TIP must include a financial plan that demonstrates the programmed projects can be implemented, and must be accompanied by a transportation-air quality conformity analysis. To further assist in the public assessment of the 2013 TIP, and specifically to address the equity implications of the proposed TIP investments, MTC has conducted an investment analysis with a focus on low-income and minority residents.

MTC has also prepared a Draft Transportation-Air Quality Conformity Analysis for Plan Bay Area and the 2013 TIP. As required by federal conformity regulations, MTC must demonstrate that the TIP is consistent with ("conforms to") the federal air quality plan known as the State Implementation Plan. Conformity to the SIP means that the transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards. For the Bay Area, the conformity analysis addresses the national 8-hour ozone standard, national carbon monoxide standard, and the national 24-hour fine particulate matter standard.

MTC has developed the 2013 TIP and Draft Transportation-Air Quality Conformity Analysis in cooperation with the county Congestion Management Agencies, California Department of Transportation (Caltrans), individual cities, counties, transit operators, and other project sponsors, and in consultation with the Federal Highway Administration (FHWA), Federal Transit Administration (FTA) and U.S. Environmental Protection Agency (EPA). All projects included in the TIP are consistent with the Draft Plan Bay Area, the long-range Regional Transportation Plan (RTP), for the San Francisco Bay Area.

Copies of the Draft 2013 TIP and Draft Transportation-Air Quality Conformity Analysis for Plan Bay Area and the 2013 TIP are available for public review at the MTC-ABAG Library, 101 Eighth Street, Oakland, and at major public libraries in each of the nine Bay Area counties, and on the MTC website at: <http://www.mtc.ca.gov/funding/tip/2013>.

Prior to the formal consideration of the 2013 TIP and Transportation-Air Quality Conformity Analysis, MTC will hold public meetings and receive public comments.

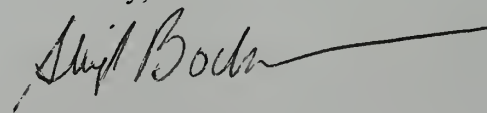

**Public Hearings:** Oral public comment on the Draft 2013 TIP and Draft Transportation-Air Quality Conformity Analysis will also be received at any of the nine public hearings for the Draft Plan Bay Area held throughout the San Francisco Bay Area. The dates and times of the public hearings can be found at: [www.onebayarea.org](http://www.onebayarea.org)

**Written Comments:** Written comments may be submitted to MTC's Public Information Office at: 101 Eighth Street, Oakland, CA 94607 or faxed to MTC at 510-817-5848 or sent via e-mail to [info@mtc.ca.gov](mailto:info@mtc.ca.gov).

Written comments are due by **4:00 p.m. on Friday May 3, 2013**. For more information, call MTC's Public Information Office at 510-817-5787.

The Final 2013 TIP and Final Transportation-Air Quality Conformity Analysis for Plan Bay Area and the 2013 TIP are scheduled for adoption by MTC on July 24, 2013. Once approved by the Commission, the 2013 TIP will be forwarded to Caltrans, FHWA and the FTA for approval and inclusion into the Federal State Transportation Improvement Program (FSTIP). Federal approval of the FSTIP is anticipated in August 2013. The Final Transportation-Air Quality Conformity Analysis and the Commission's conformity determination will be forwarded to FHWA and FTA for their joint review and concurrence.

Sincerely,

A handwritten signature in black ink, appearing to read "Alix Bockelman", with a long horizontal line extending to the right.

## The Transportation Improvement Program (TIP)

The federally required Transportation Improvement Program (TIP) is a comprehensive listing of Bay Area surface transportation capital projects that receive federal funds or are subject to a federally required action or are regionally significant. The Metropolitan Transportation Commission (MTC), as the federally designated Metropolitan Planning Organization (MPO) for the nine-county San Francisco Bay Area Region, prepares and adopts the TIP at least once every six years. The TIP covers a six-year period and must be financially constrained by year, meaning that the amount of dollars committed to the projects (also referred as “programmed”) must not exceed the amount of dollars estimated to be available. The TIP must include a financial plan that demonstrates that programmed projects can be implemented. Adoption of the TIP must be accompanied by an evaluation and finding of air quality conformity. Federal regulations also require that the public be involved and be provided opportunity to comment prior to TIP approval.

Transit, highway, local roadway, bicycle and pedestrian investments are included in the TIP. Apart from some improvements to the region’s airports, seaports, and privately owned bus and rail facilities, all regionally significant transportation projects or projects requiring federal action are part of the TIP. All projects included in the MTC-prepared TIP must be consistent with the Regional Transportation Plan (RTP) for the Bay Area.

### The 2013 TIP: Features and Highlights

- The 2013 TIP complies with the requirements under the current federal Transportation Act: Moving Ahead for Progress in the 21st Century (MAP-21). Congress approved MAP-21 in July 2012.
- The 2013 TIP includes approximately 880 transportation projects including several grouped listings or lump-sum entries for certain program categories, such as state highway maintenance, that include additional projects.
- The 2013 TIP covers six years of programming for federal fiscal years 2012-13 through 2017-18.
- The 2013 TIP includes federal, state, and local programming of projects totaling approximately \$17 billion during the six-year TIP Period.
- The 2013 TIP includes total project funding (including the funding prior to, within the TIP Period and after the six-year TIP period) totaling \$52 billion.

The 2013 TIP may be viewed online on the MTC Web site at: <http://www.mtc.ca.gov/funding/tip>.

As an added feature, individual project listings may also be viewed interactively with the latest information as the TIP is revised through MTC’s online (web based) Fund Management System (FMS) at [http://www.mtc.ca.gov/funding/fms\\_intro.htm](http://www.mtc.ca.gov/funding/fms_intro.htm).

Some of the listed projects have been mapped to present the online reader with a visual location of the project. Those without access to the Internet may view a printed copy of the project listings at the MTC-ABAG Library in Oakland at 101 Eight Street, and at major public libraries in the Bay Area.

## ***Plan Bay Area (RTP) and the TIP***

The Draft Regional Transportation Plan (RTP), *Draft Plan Bay Area*, is the Bay Area's comprehensive roadmap to guide transportation investment over 28 years. The RTP establishes the financial foundation for how the region invests in our transportation system by identifying how much money is available to address critical transportation needs and sets the policy on how this funding is to be spent on transportation needs. The RTP is updated every four years to reflect new planning priorities and changing projections of growth and travel demand, based on a realistic forecast of future revenues. The program of projects in the RTP must also help protect regional air quality. *Draft Plan Bay Area* is available at the MTC-ABAG Library and online at <http://onebayarea.org/>

## **Sustainable Community Strategy (SCS)**

The *Draft Plan Bay Area* is new and different from the previous RTP, because for the first time ever legislation calls upon MTC and ABAG to adopt a Sustainable Communities Strategy, which will coordinate land use and transportation in the regional transportation plan. Taken together, the land use patterns and transportation investments aim to reduce greenhouse gas emissions for cars and light-duty trucks in the nine-county region. The *Draft Plan Bay Area* addresses new requirements flowing from California's 2008 Senate Bill 375 (Steinberg), which calls on each of the state's 18 metropolitan areas to reduce greenhouse gas (GHG) emissions from cars and light trucks. This is important because the transportation sector represents about 40 percent of the GHG pollution that scientists say is contributing to climate change.

*Draft Plan Bay Area* also addresses the challenge of accommodating the Bay Area's future growth. Our population is expected to increase from about 7 million in 2011 to approximately 9 million in 2040. We need to make transportation, housing and land-use decisions now to sustain the Bay Area's high quality of life for current and future generations. The Sustainable Communities Strategy promotes compact, mixed-use commercial and residential development that is walkable and bikable and close to mass transit, jobs, schools, shopping, parks, recreation and other amenities.

In March 2011, MTC and ABAG took the first step in crafting the Sustainable Communities Strategy when they introduced their Initial Vision Scenario showing where and how the region might grow so as to be able to sustainably accommodate 2 million more residents by 2035. The land use distribution emphasizes growth in the 169 locally proposed Priority Development Areas (PDAs) along the region's core transit network by accommodating 100 percent of new growth within existing urban growth boundaries and urban limit lines. A key part of the PDA strategy is to move away from an unplanned "project by-project" approach to growth, toward the creation of complete communities that meet the needs of existing and new residents and workers. The land use distribution also emphasizes protection for the region's agricultural, scenic and natural resources areas, including Priority Conservation areas (PCAs). Priority Conservation Areas comprise over 100 regionally significant open spaces for which there exists broad consensus

for long-term protection, but which face nearer-term development pressures. The PCAs and PDAs complement one another: promoting compact development within PDAs takes development pressure off the region's open space and agricultural lands. If successful, the *Draft Plan Bay Area* will give people more transportation choices, create more livable communities and reduce the pollution that causes climate change. Also the plan looks towards protecting open space and other natural resources.

The vision for the *Draft Plan Bay Area* is rooted in the Three "E"s of Economy, Environment and Equity. The vision is to support a prosperous and globally competitive economy, provide for a healthy and safe environment, and produce equitable opportunities for all Bay Area residents to share in the benefits of a well-maintained, efficient, regional transportation system. The seven goals that the Commission adopted for the *Draft Plan Bay Area*, give more specific expression to region's commitment to the Three "E" principles. Goals include climate protection, adequate housing, healthy & safe communities, open space & agricultural preservation, equitable access, economic vitality, and transportation system effectiveness. The policies and investments in the *Draft Plan Bay Area* are designed to help achieve these goals and to advance the Three "E"s. A performance-based planning approach was used to help focus on measurable outcomes of potential investments and the degree to which they support policy goals. In January 2012, MTC completed the evaluation of certain projects proposed for inclusion in *Draft Plan Bay Area*. The performance analysis considered whether the projects supported the draft plan's performance targets and each project's level of cost-effectiveness. The resulting analysis, called the "Transportation Project Performance Assessment," together with public involvement held in winter 2012, helped inform the trade-offs discussion and development of the *Draft Plan Bay Area* Transportation Investment Strategy, which was released in April 2012. The draft transportation investment strategy was then combined with ABAG's "Jobs-Housing Connection Strategy" to create a Preferred Land Use and Transportation Investment Strategy for the *Draft Plan Bay Area*. The two agencies adopted the preferred strategy on May 17, 2012. The preferred strategy is being further evaluated as part of the Environmental Impact Report (EIR) required by the California Environmental Quality Act (CEQA).

Staff completed an investment analysis with a focus on low-income and minority populations (Appendix A-2). The key question asked in the investment analysis is: "Are low-income and minority populations sharing equitably in the TIP's financial investments?"

This analysis attempts to take a relatively conservative approach to assigning investments (or "benefit") to low-income households given some of the limitations of the analysis. The results suggest that according to several indices, the 2013 TIP invests greater public funding to the benefit of low-income and minority communities than their proportionate share of the region's population or trip-making as a whole.

- The analysis concluded in the aggregate that there is a relatively higher proportional investment in the 2013 TIP than either the proportionate share of trips taken by minority and low-income populations.
- In delving deeper into the investments by mode, one finds that the results are similar. For example, for transit, the results showed that for low-income populations, the share of investment (57 percent) was slightly higher than the share of trips (55 percent). The share of investment in minority transit trips (63 percent) is both slightly greater than the minority share of the total population and also slightly more than the share of transit trips made by minority populations (62 percent). For streets and road investments, these findings also hold true for the minority trips but not for the low-income drivers when

compared against the Vehicle Miles Traveled. However, in no case, do the results appear to demonstrate a systematic disbenefit to low-income or minority populations.

- The Title VI Analysis finds no disparate impact in the distribution of Federal and State funding for public transportation purposes between minority and non-minority populations or riders in the draft 2013 TIP.

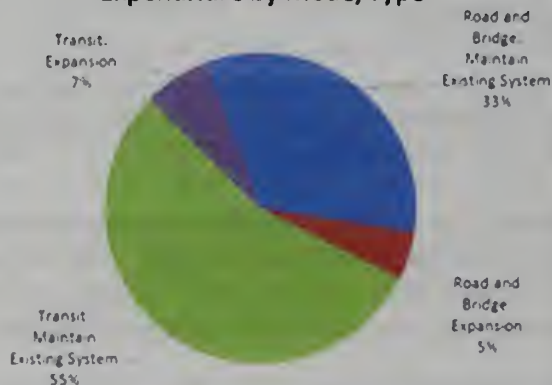

The analysis is a companion to the TIP and will make more user-friendly investment data available to the public. Staff envisions the analysis will be dynamic and will evolve based on feedback from stakeholders going forward. In addition to enhancements to the low-income and minority population focused investment analysis, future analyses could look at different focus areas.

## Investment Decisions

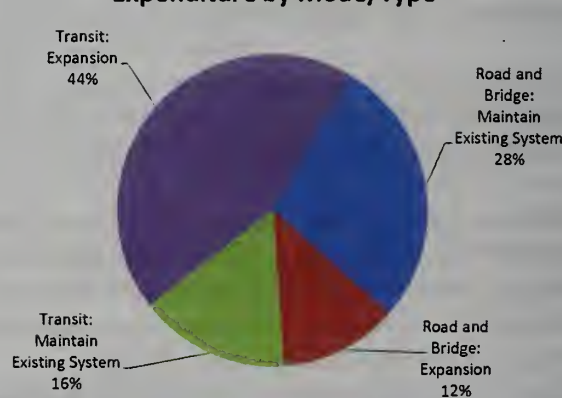

The *Draft Plan Bay Area* dedicates 88% of the \$289 billion in projected transportation revenues over the 28-year period to maintaining and managing the region's current transportation network of transit, bridges, highways, and local streets and roads. As illustrated below, the other investment categories address expansion for transit; bridge, highway and complete streets at roughly 12%.

The policies of the *Draft Plan Bay Area*, the Bay Area's draft regional transportation plan, favor maintenance and management of the existing transportation system as the first line need, by funding 90% of the transit operating and capital replacement costs for Bay Area transit providers and roughly 56% of the local streets and roads maintenance on the streets and road network in the Bay Area.

**Plan Bay Area Investments  
Expenditure by Mode/Type**

**TIP Investments  
Expenditure by Mode/Type**

Investment Category	Plan Expenditures YOES billions	TIP Expenditures YOES billions
Transit: Maintain Existing System	\$159	\$3
Road and Bridge: Maintain Existing System	\$94	\$5
Transit: Expansion	\$21	\$7
Road and Bridge: Expansion	\$15	\$2
<b>Total</b>	<b>\$289</b>	<b>\$17</b>

The *Draft Plan Bay Area* is available in its entirety on MTC's website at <http://onebayarea.org/regional-initiatives/plan-bay-area.html>

By comparison, the TIP covers a six-year period and includes \$17 billion in programming. For the TIP, the breakdown of expenditures is roughly:

- Maintenance of the Existing System - \$8 billion, or 44%
- System Expansion - \$9 billion, or 66%

The TIP is limited to projects and programs with a federal interest; locally-funded transit operations and maintenance, and local streets and roads maintenance are generally not included in the TIP.

A brief discussion of the three primary investment categories from the RTP and the more specific near-term funding strategies in the TIP follows. For more detail, the Investment Plan from the *Draft Plan Bay Area* can be found in Appendix A-40, "Financial Plan."

Maintenance and Management of the Existing System: This investment category includes rehabilitation and replacement of transit vehicles and facilities as well as the upkeep of freeways and local roadways. Also included is management of the system through system operations programs.

Some of the most significant projects that the region is currently undertaking to ensure adequate maintenance are the retrofit of the East Span of the Bay Bridge, the railcar replacement program for BART, and preventative maintenance for transit operators such as AC Transit and Santa Clara VTA (refer to "Projects in the 2013 TIP Over \$200 Million" later in this document).

The investment level for streets and roads in the 2013 TIP is projected to preserve pavement in the same "fair" condition as it is now. One of the main differences between the Draft TIP and the *Draft Plan Bay Area* is that much of the revenue for streets and roads rehabilitation is through gas tax subventions that are included in the long-range plan but are not required to be part of the TIP, because these projects are funded with local dollars. In terms of near-term programming, \$320 million of STP / CMAQ is being made available during the four-year period to the nine-bay area counties through the One Bay Area Grant Program. Local streets and road rehabilitation is one of the eligible project categories for the One Bay Area Grant Program. (See Appendix A-25 for information on the OBAG Program) Also, jurisdictions receiving One Bay Area grant funds are required to have complete streets policies in place either through a board resolution or a general plan that complies with the California Complete Streets Act of 2008 to ensure that the needs of non-motorists are considered during project development.

To address transit capital maintenance needs, the *Draft Plan Bay Area* investments will fund all bus, rail car and ferry vehicle replacements and 76 percent of other high-priority investment needs, such as rehabilitation of tracks, bridges and train control systems. An assessment of 10-year needs and revenues for MTCs Transit Capital Priority Program demonstrates that if programming for transit capital replacement and rehabilitation projects is constrained to match projected Federal Transit Administration formula funds from FY 2012-13 through FY 2022-23, needs in the middle of this period 2017-2019 will exceed revenues, when expenditures on major vehicle replacement projects for BART, Caltrain and other vehicle replacements peak. In

anticipation of these peak needs and to smooth out cash flow during this 10-year period, the Commission has already established an approach of creating reserves in years when revenues exceed high-priority needs to help address the shortfalls in years when peak needs exceed revenues. The Commission will also explore financing strategies to use future transit capital revenues to help meet near-term needs if needed. In addition, the Commission has directed \$150 million of STP funds to supplement FTA formula programs to support future major fleet replacements, fixed guideway rehabilitation and other high-scoring capital needs and to support implementation of TSP projects.

The Draft Plan includes various strategies to effectively manage the system leading to higher productivity and more capacity on the region's existing transportation infrastructure. During this six-year TIP period, the region has programmed funds to Lifeline Transportation Program projects; the Climate Initiatives Program; safety projects and security projects for Bay Area transit operators; regional operations program such as the 511 program, Transit Performance Initiative, regional rideshare, and transportation marketing, Priority Conservation Areas, freeway operations including the Freeway Performance Initiative, incident management, and regional signal timing and technical assistance. Roughly \$270 million of STP and CMAQ funds have been programmed in the 2013 TIP to support these activities. Additionally \$320 million of STP / CMAQ is being made available during the four-year period to the nine-bay area counties through the One Bay Area Grant program to select bicycle and pedestrian projects, and Transportation for Livable Communities (TLC) projects, which are eligible project categories.

Transit, Bridge, Highway and Complete Streets Expansion: This investment category targets investments to expand transportation facilities, where those projects yield high productivity. These investments include high occupancy/toll lanes, highway and rail expansions, transit oriented development policies, goods movement, rapid bus routes/express bus service, etc. All major transit expansions in the TIP are part of MTC Resolution 3434 (Appendix A-7, "Regional Transit Expansion Program"), which represents the region's consensus agreement on Bay Area transit expansion.

Major strategic expansion projects with the highest levels of programming in the 2013 TIP period include among others the following:

- BART extension from Warm Springs to Berryessa
- New Central Subway in San Francisco
- Transbay Terminal in San Francisco / Caltrain Downtown Extension – Phase 1
- BART Warm Springs Extension
- Sonoma Marin Area Rail Corridor
- Capitol Expressway LRT Extension

For the complete list of projects with total project cost greater than \$200 million in the 2013 TIP, refer to "Projects in the 2013 TIP Over \$200 Million" and "Grouped Listings in the 2013 TIP Over \$200 Million" later in this document.

As mentioned above, the impact of the TIP on regional air quality also must be evaluated. In the Bay Area, it is the responsibility of MTC to make an air quality conformity determination for the TIP in accordance with federal Clean Air Act requirements and Environmental Protection Agency (EPA) conformity regulations. The Draft Air Quality Conformity Determination for the 2013 TIP is attached as Appendix A-38.

## Regional Transportation Plan (RTP) Consistency

Only projects consistent with the *Draft Regional Transportation Plan (RTP)*, *Draft Plan Bay Area*, were included in the 2013 TIP as required by federal law. This means that even fully funded projects were excluded from the 2013 TIP if they were inconsistent with the RTP. Projects are reviewed for consistency with the RTP, as they are submitted for various funding programs, and as they are amended into the TIP for the first time. Consistency also includes the requirement that project costs in the TIP do not exceed those in the RTP's funding constrained investment plan.

## Congestion Management Process

Responding to requirements established through SAFETEA, MTC generally updates its congestion management process (CMP) approximately every two years. The approach of the CMP recognizes existing planning processes that form the foundation of the Bay Area region's efforts to improve mobility and manage congestion. The congestion management process for the Bay Area identifies congested areas and mobility issues through routine monitoring; identification, evaluation and selection of strategies to address congestion and mobility issues; and implementation of the selected strategies. The strategies include performance monitoring, county congestion management plans, short range transit plans, major corridor studies, the Transportation Improvement Program (TIP), and the Regional Transportation Plan (RTP) along with other planning activities. The CMP has a list of focus tasks (projects and studies arising from diverse, established activities addressing congestion management and mobility) and these tasks ultimately provide information on developing transportation investment priorities which feed back into the regional planning process and the programming of projects in the TIP. The most recent CMP was adopted in 2010 and is attached in Appendix A-47.

## System Preservation, Operation, and Maintenance Costs

Both the draft TIP and the draft Plan need to take into account the estimated costs of maintaining and operating the total transportation system. The draft 2013 TIP is the programming document that implements the policies, strategies and projects contained in the *Draft Plan Bay Area* emphasizes maintaining and sustaining the existing transportation system. Firstly, projects which are directly programmed by the Commission are selected for a number of key programs developed to address various transportation needs expressly identified in the *Draft Plan Bay Area*. For example, the OneBayArea Grant program includes funding for project sponsors to use to address their system preservation. Also, FTA Formula funding programs (among other funding programs) address transit operators' maintenance needs. Secondly, funding for projects programmed to the region by entities other than MTC, such as the State, is included in the TIP. In particular the State Highway Operation and Protection Program (SHOPP) funds are incorporated into the TIP to meet the operation and maintenance requirements of the State highway system. Below are key programs in the TIP which address system preservation, operation, and maintenance of the transportation system:

- **State Highways: State Highway Operation and Protection Program (SHOPP):** The SHOPP is a program of projects administered by Caltrans designed to preserve and protect the existing State highway system. The California Department of Transportation is required to prepare a 10-year plan for the rehabilitation and reconstruction of all state

highways and bridges. The plan then becomes the basis for developing the SHOPP. SHOPP projects fall into six major categories: Collision Reduction, Bridge Preservation, Roadway Preservation, Roadside Preservation, Mobility and Emergency Response. Projects are approved for inclusion in the SHOPP on a statewide competitive basis, initiated by the Caltrans District Offices, with safety as the highest priority.

- **Local Streets and Roads:** Preservation costs for San Francisco Bay Area local roadway infrastructure (pavement, non-pavement and locally owned bridges) are determined using a process that incorporates pavement management programs and analysis completed by jurisdictions. The information on local street and road needs feeds into the Draft Regional Transportation Plan needs assessment and is a basis for making funds available for streets and roads preservation projects, which are programmed in the TIP. Refer to Appendix A-48 for more detailed information and Streets and Roads needs and analysis.
- **Transit Operations and Rehabilitation:** The TIP includes Financial Capacity Assessments for public transit agencies in the region, which assess the financial state of the transit operators in the region and initiatives being undertaken to maintain the existing capital plan and service operations. The assessments are included in Section 2 of the TIP document. Also, under the Transit Performance Initiative (TPI), MTC also created an incentive program to reward transit agencies that achieve ridership increases and productivity improvements, and has allocated funds to projects in the TIP on the basis of performance, thereby encouraging greater efficiencies and better service to the public.

## TIP Development and Schedule

MTC develops the draft TIP in cooperation with the Bay Area Partnership and its constituent members including individual cities and counties, transit operators and other project sponsors. The Partnership consists of federal and state agencies, county Congestion Management Agencies (CMAs), public transit providers, and city and county public works representatives. The Board provides a forum for top managers of the region's transportation system to contribute to the policy-making and fund programming activities of MTC, and to improve coordination within the region. The Partnership, working through its committees and task forces, played a significant role in the selection of projects programmed in the 2013 TIP.

Central to developing the draft TIP is MTC's process for deciding how to invest "flexible" federal dollars, meaning those funds that can be used on a variety of transportation needs, be they local streets, bus replacements, rail extensions, a new freeway interchange or bicycle and pedestrian facilities. To develop a plan for spending funds for the federal Surface Transportation Program (STP) and Congestion Mitigation and Air Quality Improvement Program (CMAQ), MTC works closely with local partner agencies and its citizen-based Policy Advisory Council to develop regional priorities. The priorities stem from the long-range plan, the *Draft Plan Bay Area*.

Most of the projects in the 2013 TIP are carried over from the 2011 TIP. To decide which projects to carryover, MTC requested project sponsors of projects in the 2011 TIP to indicate which of their projects had been completed, were well underway or were still in planning or early

implementation stages. During the preliminary review of the draft TIP, project sponsors also were allowed to propose new projects to be included in the 2013 TIP. A list of all new projects was provided to the Air Quality Conformity Task Force (MTC's inter-agency consultation group for air quality purposes) prior to being added into the draft TIP. This list of new projects can be found in Appendix A-41.

Once the 2013 Draft TIP has been developed, it is then released for public review and comment. As part of the public review process, the draft document is sent to over 30 major libraries throughout the Bay Area as well as the MTC-ABAG library. Notices are also sent to an extensive list of interested parties including transportation agencies, other state, federal and tribal agencies and other transportation interests with the objective to continue the consultation process for transportation planning and investments in the Bay Area. The 2013 Draft TIP is also submitted through intergovernmental review, via the Association of Bay Area Government's Regional Clearinghouse, which notices all local agencies in the Bay Area and receives their comments. The document can be downloaded from the MTC website ([www.mtc.ca.gov](http://www.mtc.ca.gov)). A public meeting is also conducted to solicit public comment. After the close of the public comment period, MTC's response to significant comments is compiled into Appendix A-51 in the Final 2013 TIP. This review process is conducted according to the Public Participation Plan (PPP) process adopted by MTC. The PPP is detailed in a later section.

After the public comment period, the 2013 TIP document is then presented to a standing committee of the Commission. After its review, the committee forwards the document to the full Commission for adoption. The draft 2013 TIP is sent to the Caltrans Office of Federal Programs for inclusion into the California Federal Statewide Transportation Improvement Program (FSTIP) or Statewide TIP. After a comment period and review and approval by Caltrans, the FSTIP is forwarded to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) for their review and approval. Approval by FHWA/FTA constitutes the final approval of the TIP. The tentative 2013 TIP schedule is as follows:

March 29, 2013:	Draft 2013 TIP and Draft Air Quality Conformity Analysis of the Plan and Draft 2013 TIP released for public review and comment.
April/May, 2013:	Public hearings in the nine counties of the San Francisco Bay Area. Meeting dates and locations posted at <a href="http://www.onebayarea.org">www.onebayarea.org</a> .
May 3, 2013:	End of public review and comment of Draft 2013 TIP and Draft conformity analysis of the Plan and 2013 TIP.
June 12, 2013	MTC committee review of Draft TIP and Air Quality Conformity Analysis of the Plan and Draft 2013 TIP and referral to Commission
July 24, 2013:	Commission scheduled to approve final 2013 TIP and final conformity analysis of the Plan and 2013 TIP (anticipated date)
August, 2013:	2013 TIP Approval by FHWA / FTA (anticipated date)

## Public Participation Process

MTC is committed to a public involvement process that is transparent, proactive and provides comprehensive information, timely public notice, full public access to key decisions, and opportunities for continuing involvement. The process for updating and revising the Transportation Improvement Program (TIP) is directed by procedures contained in the MTC Public Participation Plan. MTC provides many methods to fulfill this commitment, as outlined in MTC's Public Participation Plan (PPP) Resolution No. 3821. The Public Participation can be downloaded from MTC's website at [http://www.mtc.ca.gov/get\\_involved/participation\\_plan.htm](http://www.mtc.ca.gov/get_involved/participation_plan.htm), and is included in Appendix A-3.

Further, Federal transit law and joint Federal Highway Administration (FHWA)/Federal Transit Administration (FTA) planning regulations governing the metropolitan planning process require a locality to include the public and solicit comment when the locality develops its metropolitan long-range transportation plan and its metropolitan TIP. FTA has determined that when a recipient follows the procedures of the public involvement process outlined in the FHWA/FTA planning regulations, the recipient satisfies the public participation requirements associated with development of the Program of Projects (POP) that recipients of Section 5307 funds must meet. The TIP and the Public Participation Plan satisfy the public participation requirements for the POP. Public notices of public involvement activities and times established for public review and comment on the TIP state that they satisfy the POP requirements of the Section 5307 Program.

## Public Participation Approach for the Transportation Improvement Program

MTC has consulted extensively with agencies and Tribal Nations affected by transportation decisions, in the preparation of the current *Draft Regional Transportation Plan, Draft Plan Bay Area*. For the 2013 TIP, this consultation was continued as follows:

- Project sponsors including the California Department of Transportation (Caltrans) local jurisdictions and transit operators: Project sponsors and their county Congestion Management Agencies (CMAs) reviewed and consulted with MTC on each of their respective projects in the TIP. Furthermore, through the Bay Area Partnership, these agencies are involved every step of the way in the establishment of MTC programs and the selection of project criteria and delivery of transportation projects contained in the TIP.
- MTC and other regional agency staffs meet periodically with the Tribal Nations in the region to consult with them on the development of the Regional Transportation Plan and related programming processes. For the development of the upcoming update of the RTP a Tribal Summit was held on March 20, 2012 (prior to release of the initial draft TIP), to discuss respective MTC and tribal roles in the development of transportation plans and programs in the Bay Area. The TIP guides were distributed at the Summit.
- Air Quality consultations on air quality issues occur through the Air Quality Conformity Task Force (including the BAAQMD as well as representatives of the US EPA, California Air Resources Board (ARB), Federal Highway Administration and Federal Transit Administration and state and local transportation agencies) which review the 2013 TIP and its air quality conformity analysis.

- Over 2000 Notices on the 2013 Draft TIP were mailed out along with instructions on how to access and comment on the 2013 Draft TIP on the MTC website. The mailing roster targeted the agencies involved in the preparation of the Transportation Plan including Tribal Nations. Additionally, state agencies and local agencies were consulted through the Intergovernmental Review Process (Association of Bay Area Government's Area-wide Clearinghouse)
- MTC has published an update to the Guide to the San Francisco Bay Area's 2013 TIP targeted to the public. The objective of the guide is to better explain what the TIP is in the context of a larger planning and project development process. Since the first edition two years ago, the Guide has been posted on the MTC website and distributed to the public at various workshops including the public hearing and other events. MTC also distributed the guide to state, local and federal resource agencies and tribal nations as part of our consultation on the development of the 2013 TIP. The updated Guide is included as Appendix A-37 and is available on MTC's website at [http://www.mtc.ca.gov/funding/tip/DRAFT\\_2013/Guide\\_to\\_TIP.pdf](http://www.mtc.ca.gov/funding/tip/DRAFT_2013/Guide_to_TIP.pdf).
- MTC's compliance with the California Environmental Quality Act (CEQA) for the Regional Transportation Plan also serves as the framework to consult, as appropriate, with federal, state and local resource agencies responsible for land use management, natural resources, environmental protections, conservation, and historic preservation. As part of the Draft RTP update, which is referred to as *Draft Plan Bay Area*, MTC, together with the Association of Bay Area Governments, hosted four agency and public scoping meetings for the *Draft Plan Bay Area* EIR in June 2012. At these scoping meetings, the development of the TIP was presented and connections with the RTP were highlighted.

## TIP Period

The 2013 TIP covers a 6-year period from Federal Fiscal Years 2012-13 through 2017-18. All other funds are only shown for illustrative purposes. Estimated funds in future years (beyond the six years that comprise the 2013 TIP) and previously expended funds (shown as 'prior') are included for informational purposes. All projects included in the TIP must show the total project cost escalated to the year of expenditure. Projects may be revised as cost estimates are refined.

## Financial Constraint

The TIP must be financially constrained, meaning that the amount of funding programmed must not exceed the amount of funding estimated to be reasonably available. In developing the 2013 TIP, MTC has taken into consideration the transportation funding revenues expected to be available during the six years of the TIP (Federal FY 2012-13 through FY 2017-18), and has found the 2013 TIP to be financially constrained by program and by year.

Additionally, this constraint requirement applies to each of the six program years and because the San Francisco Bay Area is an air quality non-attainment area, only projects with committed or reasonably available funded committed to the project may be programmed in the first two years of the TIP. MTC re-demonstrates fiscal constraint with every amendment to the TIP.

Fiscal constraint requirements encompass both the operation and maintenance of capital projects in the TIP and the estimated costs of maintaining and operating the transportation system as a whole. The framework of both MTC's current RTP and 2013 TIP meet this requirement.

The 2013 TIP is a compilation of mostly previously programmed projects, reflecting previous TIP programming actions by the Commission. Examples include the Regional Transportation Improvement Program (RTIP), federal transit formula grant projects (Section 5307 and 5309), Surface Transportation Projects (STP), Congestion Mitigation and Air Quality (CMAQ) and Transportation Enhancement (TE)/Transportation Alternatives (TA) Programs authorized by the extension of SAFETEA and enactment of MAP-21. The TIP also includes Toll Bridge projects and regionally significant local projects approved and funded by transportation agency partners and/or referenda. Examples here include the voter approved toll increase in the Bay Area, Regional Measure 2, and county sales tax measures.

The constrained 2013 TIP also includes available State funds, including Proposition 1B and State Transportation Improvement Program (STIP) funds, utilizing the latest fund estimates, and funding actions by the State.

MTC continuously monitors developments in funding programs and funding needs of transportation projects, as reflected by the TIP project listing. Any significant changes are reviewed by MTC and its transportation partners; and, if needed, MTC will take appropriate actions, such as a TIP revision, to maintain the financial constraint of the TIP. For the FSTIP financial constraint, please refer to Appendix A- 54.

## **Revisions to the TIP**

From time to time circumstances dictate that changes be made to the TIP following its adoption. Federal regulations permit changes to the TIP if the procedures for doing so are consistent with federal requirements for TIP development and approval, and consistent with federal procedures for revisions to the Federal Statewide Transportation Improvement Program (FSTIP). MTC will consider such revisions when the circumstances prompting the change are compelling, and the change will not adversely affect air quality conformity or financial constraint findings of the TIP. All changes must be consistent with the regional transportation plan.

The TIP revision process is further outlined in the MTC TIP Revision Process and Procedures document included in Appendix A-46 and by the MTC Public Participation Plan, which is available in Appendix A-3.

## **Relationship of the TIP to Other Federal and State Transportation Programs**

### **Federal Statewide Transportation Improvement Program**

Just as each metropolitan region is required to develop a TIP, each state is required to develop a Federal Statewide Transportation Improvement Program (FSTIP) pursuant to federal

regulations. The FSTIP includes all projects with federal funds, those that require a federal action and regionally significant transportation projects throughout the state. In California, regional TIPs are included in the FSTIP without modification once approved by the relevant Metropolitan Planning Organization (MTC, in the case of the Bay Area) and after the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) make their required financial constraint and air quality findings. Projects must be in the FSTIP before funding authorities, such as FTA, FHWA, or the California Department of Transportation (Caltrans), can “obligate” funds (i.e., commit funds to contract) and therefore, before sponsors can actually spend any of these monies.

## **State Transportation Improvement Program**

The California Transportation Commission (CTC) is required to biennially adopt, and submit to the Legislature and the Governor, a State Transportation Improvement Program (STIP). The STIP is a comprehensive listing of all major projects to be funded from specified state funding programs, including certain federal funds that flow directly to the state. As a result, many of the projects that are included in the STIP must eventually be included in the regional TIPs and the FSTIP as well.

The bulk (75 percent) of the STIP consists of spending programs developed at the regional level throughout California, called the Regional Transportation Improvement Programs (RTIP). The CTC releases a Fund Estimate informing each region how much money it can expect to receive from various sources. This estimate is guided by statutory requirements that direct how the funds are divided up throughout the state.

Caltrans proposes another element of the STIP for the CTC to adopt, known as the Interregional Transportation Improvement Program, or ITIP. The ITIP comprises the remaining 25 percent of STIP funding. It is intended to address transportation infrastructure needs that cross metropolitan boundaries and link the state’s transportation system; for example, intercity rail, interregional highways and the like.

## **Fund Sources Programmed in the TIP**

The 2013 TIP programs transportation funding from a wide variety of sources. Several of the major sources from which funds are programmed are:

### **Federal Transit Administration (FTA) Programs**

- Section 5307 Urbanized Area Formula
- Section 5309 Fixed Guideway Modernization
- Section 5309 Bus & Bus Facilities
- Capital Investment Grants (Section 5309 New Starts and Small Starts)
- Section 5337 State of Good Repair

- Section 5339 Bus & Bus Facilities
- Section 5310 Elderly and Disabled Program
- Section 5311 Non Urbanized Areas
- Section 5316 Job Access and Reverse Commute Program (JARC)
- Section 5317 New Freedom Program
- Federal Discretionary Programs (including Earmarks)

### **Federal Highway Administration (FHWA) Programs**

- Surface Transportation Program (STP)
- Congestion Mitigation and Air Quality Improvement Program (CMAQ)
- Transportation Alternatives Program (formerly known as Transportation Enhancements)
- Federal Discretionary Programs (including Earmarks)

### **State, Regional, and Local Programs**

Not all state and local funds have to be programmed in the TIP. However, if these funds are used to match federal dollars described above, or if they are attached to projects that require federal approval or other formal federal action, or if the project funded is considered to be regionally significant, they must be included in the TIP. Such state and local fund sources can include the following:

- State Transportation Improvement Program (STIP), comprising the Regional Transportation Improvement Program (RTIP) and the Interregional Transportation Improvement Program (ITIP)
- Proposition 1B Bond Funds, approved by voters in 2006, which includes Corridor Mobility Improvement Account (CMIA), Trade Corridors Improvement Fund (TCIF), and Public Transportation Modernization, Improvement, and Service Enhancement Account (PTMISEA) funds;
- State Highway Operations and Protection Program (SHOPP);
- Transportation Development Act (TDA) & State Transit Assistance (STA) funds;
- Proceeds from county half-cent transportation sales taxes, and sales taxes for transit;
- Regional Measure 1 (RM 1), Regional Measure 2 (RM 2), and other bridge toll funds;

Various other funds programmed to regionally significant, locally funded projects.

## Project Funding Selection

### Development of Project Proposals

Ideas for projects emerge from a variety of planning efforts at the city, county, transit operator, and regional levels. Some of the major sources for projects are the county congestion management programs, countywide transportation plans, transit operator short-range transit plans or similar transit capital and service planning efforts, and the state highway planning process conducted by Caltrans. These efforts are then merged with the planning efforts of the Draft Regional Transportation Plan. When the project scope, schedule, and budget are fully developed, the project may then be proposed for funding.

Project sponsors (the agencies designated to implement the projects) are responsible for initiating requests for TIP programming, applying for the programmed funds, and carrying their projects to completion. In the Bay Area, the implementing agencies include public transit operators, Caltrans, MTC, the Bay Area Air Quality Management District, the Congestion Management Agencies, the nine Bay Area counties, several joint power authorities, and the individual cities within each county. Questions regarding specific details of projects listed in the TIP should be directed to the project sponsors.

### Project Selection Processes

The process by which a project is selected for programming utilizing federal, state, and regional funds, depends on the type of project, and the specific fund source being sought. Once selected, the project is then eligible for inclusion in the TIP. Below is a listing of the major processes and MTC resolutions that describe the selection processes. The resolutions are available on the MTC Website at <http://www.mtc.ca.gov/funding/tip/> and as appendices to this document.

Coordinated Public Transit-Human Services Transportation Plan,	
Resolution No. 3787.....	Appendix A-6
Regional Transit Expansion Program, Resolution No. 3434 .....	Appendix A-7
2012 Regional Transportation Improvement Program (RTIP),	
Resolution No. 4028.....	Appendix A-11
Transit Capital Priorities, Resolution No. 4072.....	Appendix A-13
Lifeline Transportation Program Guidelines, Resolution No. 4033.....	Appendix A-19
New Transportation Authorization Act - STP/CMAQ – Cycle 1,	
Resolution No. 3925.....	Appendix A-24
New Transportation Authorization Act - STP/CMAQ – Cycle 2,	
Resolution No. 4035.....	Appendix A-25
FTA Elderly and Persons with Disabilities Program, Resolution No. 4005 .....	Appendix A-28
2012 and 2013 FTA Nonurbanized Area Formula Program of Projects,	
Resolution No. 4048.....	Appendix A-29
New Freedom Program, Resolution No. 4041 .....	Appendix A-31

## Air Quality Conformity

Transportation conformity is required under CAA section 176(c) (42 U.S.C. 7506(c)) to ensure that federally funded or approved highway and transit activities are consistent with (“conform to”) the purpose of the state air quality implementation plan (SIP). Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant NAAQS or any interim milestones. EPA’s transportation conformity rule (40 CFR Parts 51 and 93) establishes the criteria and procedures for determining whether metropolitan transportation plans, TIPs, and federally supported highway and transit projects conform to the SIP. Transportation conformity applies to designated nonattainment and maintenance areas for transportation-related criteria pollutants: ozone, PM<sub>2.5</sub>, PM<sub>10</sub>, carbon monoxide, and nitrogen dioxide.

Using the latest planning assumptions, MTC conducted a new air quality conformity analysis for the 2013 TIP. The conformity determination was made under the motor vehicles emissions budget contained in the 2001 1-Hour Ozone Attainment Plan for the ozone precursors and the 2000 Carbon Monoxide Maintenance Plan. Conformity for the 2006 24-hour PM<sub>2.5</sub> standard was demonstrated by conducting an interim conformity test. The Transportation Control Measures (TCMs) A through E in the approved 2001 Ozone Attainment Plan have been fully implemented. All information on the timely implementation of TCMs in the Conformity Report is still current. A copy of the analysis is included as Appendix A-38, to the TIP document and is available for public review at the MTC-ABAG Library, 101 Eighth Street, Oakland, and on the MTC Web Site at: <http://www.mtc.ca.gov/funding/tip/>

## Grouped (Lump Sum) Listings in the TIP

Federal regulations 23 CFR 450.216 and 450.324 allow projects exempt from air quality conformity analysis listed under 40 CFR 93.126 & 127, Tables 2 & 3, to be grouped within the TIP. The process for including, or revising a project in the grouped (lump sum) listing, must follow the process and procedures (Appendix A-43) for state-managed grouped project listings, as agreed to by the California Federal Programming Group (CFPG), California Department of Transportation (Caltrans), Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). It is intended that MTC’s Grouped (Lump Sum) Listings in the TIP follow, and adhere to the provisions of the State-Managed Grouped Project Listings Process.

The back-up lists for Grouped Listings in the TIP can also be accessed on the MTC’s TIP website: <http://www.mtc.ca.gov/funding/tip/2013/grouped.htm>.

Examples of some of the groupings include, but are not limited to the following:

- Highway Bridge Program (HBP)
- Highway Safety Improvement Program (HSIP)
- Safe Routes to School (SR2S)

## Projects Implementing the Americans with Disabilities Act (ADA)

Consistent with Federal requirements, the 2013 TIP identifies projects implementing the Americans with Disabilities Act (ADA) required paratransit and key station plans.

The Americans with Disabilities Act (ADA) requires that public transportation services and facilities, including trains and rail stations, be accessible to persons with disabilities. Federal regulations allow each rail system operator to designate certain stations as key stations and to make these readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. Most of the projects adopted in the key station plans have been implemented. Appendix A-44 lists some of the ongoing ADA implementation projects.

## TIP Project Implementation

Federal regulations require that the TIP list major projects from the previous TIP that were implemented. Appendix A-42 is the list of all the 419 completed projects that were present in the 2011 TIP and have been archived in revisions to the 2011 TIP or are being archived during the 2013 TIP process. This list does not include the projects that are in the 2013 TIP with no funding within the 2013 TIP Period but are listed in the TIP for illustrative purposes nor does it include projects that were removed from the TIP when the funds were redirected or if the project did not go forward due to implementation issues.

In addition to meeting federal regulations, this also aids in monitoring the effectiveness of the programming process. The breakdown of the funds into federal, state, regional and local funds for the archived projects is as follows:

Fund Type	Funding within TIP Period (FY 2013 - FY 2018)		Total Funding (all Years)	
	(in million \$)	%	(in million \$)	%
Federal	\$3,074	30%	\$279	19%
State	\$4,979	49%	\$945	65%
Regional	\$307	3%	\$13	1%
Local	\$1,770	17%	\$217	15%
Total:	\$10,130	100%	\$1,454	100%

The distribution of funds between travel modes for the archived projects is as follows:

Mode	# of Projects		Funding within TIP Period (FY 2013 - FY 2018)		Total Funding (all Years)	
	#	%	(in million \$)	%	(in million \$)	%
Bicycle/ Pedestrian	64	15%	\$142	1%	\$31	2%
Local Road	174	42%	\$892	9%	\$223	15%
Regional	1	0%	\$2	0%	\$0	0%
State Highway	51	12%	\$7,004	69%	\$1,102	76%
Transit	129	31%	\$2,089	21%	\$98	7%
Grand Total	419	100%	\$10,130	100%	\$1,454	100%

## Project Funding Delivery

The region has established funding deadlines for certain FHWA-administered funding, including Surface Transportation Program (STP) and Congestion Mitigation and Air Quality improvement (CMAQ) funds, to ensure timely project delivery against state and federal funding deadlines. The Region's Project Funding-Delivery Policy (MTC Resolution No. 3606, revised) establishes a standard policy for enforcing project funding deadlines and project substitutions for these, and other FHWA-administered funds. Projects selected to receive federal funds must have a demonstrated ability to use the funds within the established regional, state and federal funding deadlines. This criterion will be used for selecting projects for funding, and for placement of funding in a particular year of the TIP.

To further facilitate project delivery and ensure all federal funds in the region are meeting federal and state regulations and deadlines, recipients of FHWA-administered funding will need to identify a staff position that serves as the single point of contact for the implementation of all FHWA-administered funds within that agency. The person in this position must have sufficient knowledge and expertise in the federal-aid delivery process to coordinate issues and questions that may arise from project inception to project close-out. The agency is required to confirm the contact information for this position at the time of programming of funds in the federal TIP. This person will be expected to work closely with FHWA, Caltrans, MTC and the respective CMA on all issues related to federal funding for all FHWA-funded projects implemented by the recipient.

Project sponsors that continue to miss delivery milestones and funding deadlines for any federal funds are required to prepare and update a delivery status report on all projects with FHWA-administered funds they manage, and participate if requested in a consultation meeting with the county CMA, MTC and Caltrans prior to MTC approving future Cycle programming or including any funding revisions for the agency in the federal TIP. The purpose of the status report and consultation is to ensure the local public agency has the resources and technical capacity to deliver FHWA federal-aid projects, is fully aware of the required delivery deadlines, and has developed a delivery timeline that takes into consideration the requirements and lead-time of the federal-aid process within available resources.

MTC staff actively monitors and reports the obligation status of projects to the Bay Area Partnership. The Partnership working groups will monitor project delivery issues as they arise and make recommendations as necessary. Specific provisions of the Regional project Funding-Delivery Policy are contained within MTC Resolution No. 3606, which is included as Appendix A-35.

## Fund Management

Federal funds are to be programmed in the TIP, up to the apportionment level for that fiscal year for that fund source, within the fiscal year in which the funds are to be obligated/ transferred by the Federal Highway Administration (FHWA) or obligated by the Federal Transit Administration (FTA), or awarded in a FTA grant. This improves the overall management of federal Obligation Authority (OA) within the region and ensures that OA is available for projects that are programmed in a particular fiscal year.

Projects selected for federal funding must have a demonstrated ability to use the funds within the established federal, state and regional funding deadlines. This criterion will be used for selecting projects for funding, and for placement of funding in a particular year of the TIP.

## **Toll Credits**

Section 1111(c) of the Transportation Equity Act for the 21st Century (TEA21), and 23 U.S.C., Section 1044 of ISTEA under Section 120(j) allows states to use certain toll revenue expenditures as a credit toward the non-federal matching share of programs authorized by Title 23 (except for the emergency relief programs) and for transit programs authorized by Chapter 53 of Title 49, referred as transportation Development credits.

Toll credits are not additional funds, but may be used in lieu of the non-federal match, bringing federal participation in a project to 100 percent of the project cost. The TIP must remain fiscally constrained when using toll credits in lieu of the non-federal match. Tracking of toll credits is performed through MTC's Fund Management System (FMS). Regional and State toll credits policies and procedures are included in Appendix A-20 and Appendix A-21.

## **Annual Listing of Obligated Projects**

By federal requirement, MTC publishes at the end of each calendar year an annual listing of obligated projects, which is a record of project delivery for the previous year. The publication of this list is in response to 23 U.S.C. 134(j)(7)(B), 23 U.S.C. 135(g)(4)(B), 49 U.S.C. 5303(j)(7)(B), and 49 U.S.C. 5304(g)(4)(B) as revised by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA) that require "...an Annual Listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which Federal funds have been obligated in the preceding year shall be published or otherwise made available by the cooperative effort of the State, transit operator, and metropolitan planning organization for public review. The listing shall be consistent with the funding categories identified in each metropolitan transportation improvement program (TIP)."

When a project reaches a point that funds will need to be expended, a request is sent from Caltrans to the Federal Department of Transportation requesting verification that there are funds available for reimbursement. This verification of fund availability "obligates" the funds for use as soon as expenditures occur. Fund obligations are a measure of the progress being made on a project. Projects for which funds have been obligated are not necessarily initiated or completed in the program year, and the amount of the obligation will not necessarily equal the total cost of the project. It is possible that unused funds may be credited back when not needed at the completion of a project phase resulting in a negative obligation. For Federal Transit Administration (FTA) projects, obligation occurs when the FTA grant is awarded.

The listing also is intended to increase the awareness of government spending on transportation projects to the public. Copies of this annual listing may be obtained from MTC's Web site: <http://www.mtc.ca.gov/funding/delivery/> or by calling MTC's Library at 510.817.5836. The list for the latest federal fiscal year is included in Appendix A-36.

## Expedited Project Selection Process

Federal Regulations 23 Code of Federal Regulations (CFR) Part 450.330 allow for the movement of projects within the period of the TIP and FSTIP subject to procedures agreed to by partnering agencies, including the State and transit operators within the region. MTC, as the Metropolitan Planning Organization (MPO) for the nine-county San Francisco Bay Area Region has a process in place, as outlined below, developed in consultation with the region's transportation partners that permits the movement of projects consistent with the Expedited Project Selection Process outlined in Code of Federal Regulations (CFR) 450.330. The projects listed within the TIP have all been selected based on the regulations in 23 CFR Part 450. Federal Regulation 23 CFR Part 450.330 allows for the movement of projects within the TIP/FSTIP subject to procedures agreed to by the partnering parties. This procedure is outlined as follows.

All movements must be consistent with the Regional Transportation Plan (RTP), must not adversely affect the expeditious implementation of Transportation Control Measures (TCMs), must comply with the provisions of Title VI, must not negatively impact the planned delivery of other projects in the regional programs, and must not affect the conformity finding of the TIP.

For regional Surface Transportation Program (STP), Congestion Mitigation and Air Quality Improvement (CMAQ) funds, and other funds administered by the Federal Highways Administration (FHWA), MTC has developed a project funding delivery policy through extensive consultations with its regional transportation partners including the Bay Area transit operators, Congestion Management Agencies (CMA's), counties, FHWA, FTA and Caltrans. The *Regional Project Funding Delivery Policy (MTC Resolution No. 3606, revised)* details how project-funding deadlines and fund management requirements are enforced and how projects may be moved within the time period of the adopted TIP. The policy satisfies the requirement of the expedited project selection procedures as stated in CFR 450.330. The project funding delivery policy is also embedded in the TIP revision procedures, adopted along with the 2013 TIP. Although a TIP revision is not required at the time a project is moved, a revision may be processed following each federal fiscal year to reconcile the TIP for financial constraint purposes.

For projects within the State Transportation Improvement Program (STIP), MTC will move projects subject to amendment or allocation approval by the California Transportation Commission (CTC). Caltrans may move projects in the State Highway Operation Protection Program (SHOPP) document within the TIP/FSTIP period without revising the TIP, with notification to MTC.

Caltrans Division of Local Assistance has implemented a project selection process for the Highway Bridge Program (HBP), Highway Safety Improvement Program (HSIP), Safe Routes to School (SR2S) Program and other State-administered Local Assistance programs to produce the TIP listing of projects. This process was developed in cooperation with the implementing agencies, FHWA, the MPOs, and HBP Advisory Committee. Caltrans, MTC and the transit operators agree that the Caltrans Division of Local Assistance may move projects within the HBP, HSIP, SR2S and other State-administered Local Assistance programs within the TIP/FSTIP period without revising the TIP, with notification to MTC.

For FTA administered funds, projects may be moved within the period of the TIP/FSTIP at the request of the agency, as long as funding is available and the change does not negatively impact the delivery or availability of funds for other projects ready for obligation.

Implementing agencies wishing to advance projects using their own local funds until federal funds are available may request Advance Construction Authorization (ACA) from Caltrans, or pre-award authority from FTA to proceed with the project using local funds until OA and apportionment becomes available. In accordance with the Regional Project Funding Delivery Policy (MTC Resolution No, 3606), projects using ACA or FTA Grant Award Authority for FHWA-administered funds have priority for federal obligations when the availability of Obligation Authority is limited.

## Primary Funding Programs

### Descriptions and Availability Summary

The TIP must be financially constrained, meaning that the amount of funding programmed must not exceed the amount of funding estimated to be available. In developing the 2013 TIP, MTC has taken into consideration the transportation funding revenues expected to be available during the six years of the TIP (Federal FY 2012-13 through FY 2017-18), and has found the 2013 TIP to be financially constrained. The following is a financial summary of the primary fund sources within the six years of the TIP (all dollar amounts shown in thousands). For the FSTIP Financial Constraint, please refer to Appendix A-54.

### Federal Funds

#### Federal Transit Administration Section 5307 –

Section 5307 funds are distributed to urbanized areas by the Federal Transit Administration (FTA) based on population and service factors for the five large urbanized areas of San Francisco-Oakland, San Jose, Concord, Antioch, and Santa Rosa, and population factors for the seven small urbanized areas of Vallejo, Fairfield, Vacaville, Napa, Livermore, Gilroy-Morgan Hill, and Petaluma. MTC prioritizes these funds for transit capital replacement projects such as revenue vehicles and fixed guideway, however, some funds are used for transit operations, system enhancements and job access and reverse commute projects. MTC adopted a preliminary Section 5307 program of projects for FY2012-13 and FY2013-14 in January 2013, and anticipates completing the next programming cycle in 2014. The number of years covered by the next program will be determined in 2014 based on the term of the next federal authorization.

FTA 5307	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$224,644	\$207,295	\$213,513	\$219,919	\$226,516	\$233,312	\$1,325,199
Programming	\$192,619	\$206,808	\$15,265	\$0	\$0	\$0	\$414,692
Balance	\$32,025	\$487	\$198,248	\$219,919	\$226,516	\$233,312	\$910,507

#### Federal Transit Administration Section 5309 Fixed Guideway Modernization (FG) – FTA

Section 5309 FG formula funds were distributed based on fixed guideway service factors to large urbanized areas. MTC programs the FTA 5309 FG funds using the same criteria and schedule as the FTA Section 5307 funds. The eligibility for these funds, however, are limited to

the region's fixed guideway systems including rail, ferry, and buses operating on dedicated right-of-way as prescribed by Title 23. The Section 5309 FG program was replaced with the new Section 5337 State of Good Repair program by MAP-21 starting in FY2012-13 (see below). The funds available for programming in FY2012-13 are unprogrammed balances carried over from FY2011-12. In addition, several projects in the TIP include Section 5309 FG funds programmed in previous years.

FTA 5309 FG	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$1,684	\$0	\$0	\$0	\$0	\$0	\$1,684
Programming	\$1,684	\$0	\$0	\$0	\$0	\$0	\$1,684
Balance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**Federal Transit Administration Section 5309 Bus and Bus Facilities** – The FTA Section 5309 Bus program funds were usually awarded by FTA directly to transit operators and other agencies through FTA's State of Good Repair, Bus Livability and other competitive, discretionary programs. The funds were also distributed by Congress through discretionary earmarks. Section 5309 Bus funds are used to fund bus and bus facility replacement, rehabilitation, expansion and enhancement projects. The Section 5309 Bus program was replaced with the new Section 5339 Bus and Bus Facilities formula program by MAP-21 starting in FY2012-13 (see below). Several projects in the TIP include Section 5309 Bus funds programmed in previous years.

**Federal Transit Administration Section 5309 Capital Investment Grants** – The FTA Capital Investment Grants program is a nationally competitive program and is used to fund new and expanded fixed guideway systems including bus rapid transit systems. This program includes the New Starts and Small Starts funding programs.

FTA 5309 CIG	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$151,182	\$154,077	\$854,291	\$520,721	TBD	TBD	\$1,680,271
Programming	\$151,182	\$154,077	\$854,291	\$520,721	\$0	\$0	\$1,680,271
Balance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**Federal Transit Administration Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities** – FTA Section 5310 funds are available to states or local government authorities, private non-profit organizations, or operators of public transportation for capital and operating projects that serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Within California, Caltrans is the designated recipient for the small urbanized area (UA) and rural funds, and is currently in the process of identifying the designated recipient(s) for the large urbanized area (UA) funds. In the past, MTC has coordinated the local region's grant review process. The California Transportation Commission is expected to adopt the FY2012 program of projects in September 2013. MAP-21 requires that projects be derived from a Coordinated Public Transit-Human Services Transportation Plan ("Coordinated Plan"). The Bay Area's Coordinated Plan was adopted in March 2013.

FTA 5310	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$5,707	\$5,787	\$5,961	\$6,140	\$6,324	\$6,514	\$36,433
Programming	\$0	\$0	\$0	\$0	\$0	\$0	\$0
Balance	\$5,707	\$5,787	\$5,961	\$6,140	\$6,324	\$6,514	\$36,433

**Federal Transit Administration Section 5311 Non-Urbanized Formula Program** – FTA Section 5311 funds are available to transit operators that provide transportation services in non-urbanized areas. MTC develops the funding priorities for the Bay Area in conjunction with

Caltrans who is the designated recipient and administers the funds. MTC programs the Bay Area's regional apportionment to transit operators according to each operator's non-urbanized area population and non-urbanized area route miles. Recipients are required to prioritize the replacement of capital equipment, with top priority for capital assets needed to maintain existing transit services. Recipients may use funds for operations if they document that the funds are not needed to maintain or replace capital equipment. Currently, funds are programmed through FY 2012-13.

FTA 5311	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$2,035	\$1,892	\$1,948	\$2,007	\$2,067	\$2,129	\$12,078
Programming	\$2,035	\$0	\$0	\$0	\$0	\$0	\$2,035
Balance	\$0	\$1,892	\$1,948	\$2,007	\$2,067	\$2,129	\$10,043

**Federal Transit Administration Section 5316 Job Access and Reverse Commute Program (JARC)** – FTA Section 5316 funds were available for job access projects designed to transport welfare recipients and other eligible low income individuals to and from jobs and other trips related to employment. MAP-21 eliminated Section 5316 as a separate program and combined its function and funds with the Section 5307 program (see above). Several projects in the TIP include Section 5316 funds programmed in previous years.

**Federal Transit Administration Section 5317 New Freedom Program** – FTA Section 5317 was created by SAFETEA to provide formula funding for new public transportation services and public transportation alternatives beyond those required by ADA to assist persons with disabilities. MAP-21 eliminated Section 5317 as a separate program and combined its function and funds with the Section 5310 program (see above). Several projects in the TIP include Section 5317 funds programmed in previous years.

**Federal Transit Administration Section 5337 State of Good Repair Program** – FTA Section 5337 is a new funding program created by MAP-21 to replace the Section 5309 Fixed Guideway Modernization program (see above). Eligible uses of the funds are similar: replacement and rehabilitation of fixed guideway assets including railcars, ferry vessels, buses operating in HOV lanes, and related infrastructure. The funds are distributed by FTA to the four large urbanized areas of San Francisco-Oakland, San Jose, Concord and Antioch based on service factors. MTC programs the Section 5337 funds using the same criteria and schedule as the FTA Section 5307 funds.

FTA 5337	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$168,551	\$170,886	\$176,013	\$181,293	\$186,732	\$192,334	\$1,075,809
Programming	\$142,128	\$148,041	\$0	\$0	\$0	\$0	\$290,169
Balance	\$26,423	\$22,845	\$176,013	\$181,293	\$186,732	\$192,334	\$785,640

**Federal Transit Administration Section 5339 Bus and Bus Facilities Program** – FTA Section 5339 is a new funding program created by MAP-21 to replace the Section 5309 Bus and Bus Facilities program (see above). Eligible uses of the funds are similar: bus and bus facility replacement, rehabilitation, expansion and enhancement projects. The funds are distributed to the 12 Bay Area urbanized areas by FTA based on population and service factors. MTC programs the Section 5339 funds using the same criteria and schedule as the FTA Section 5307 funds.

FTA 5339	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$12,689	\$12,864	\$13,249	\$13,647	\$14,056	\$14,478	\$80,983
Programming	\$12,512	\$12,387	\$0	\$0	\$0	\$0	\$24,899
Balance	\$177	\$477	\$13,249	\$13,647	\$14,056	\$14,478	\$56,084

**Regional Surface Transportation Program (STP):** Federal transportation legislation authorizes the State of California to distribute regional Surface Transportation Program (STP) funds to areas within the State based on urbanized population shares. MTC pools the STP funds coming to the San Francisco Bay Area with CMAQ funds to develop a comprehensive and multi-modal program, the OneBayArea Grant (OBAG) Program. MTC has established various programs, cooperatively developed with our transportation partners funded by STP/CMAQ. In general, the STP programs fund the Local Streets and Road rehabilitation Program, the Transit Capital Rehabilitation Shortfall Program, and regional operations programs; but in this TIP period counties can request that this funding also be used to fund programs such as the bicycle and pedestrian program and the Transportation for Livable Communities Program which were limited to CMAQ in the past. Programming is based on apportionments provided by Caltrans and the Federal Highway Administration (FHWA). STP apportionments for the SAFETEA extension period (FY 2008-09 through FY 2011-12) are fully programmed through the Cycle 2 STP/CMAQ OneBayArea Grant Program. While regional programs using STP are already included, the county selected projects will be programmed through a TIP amendment at a later date, once the counties have completed their project solicitation and selection.

STP	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$85,297	\$94,533	\$94,533	\$94,533	\$94,533	\$94,533	\$557,962
Programming	\$84,065	\$88,820	\$14,956	\$0	\$0	\$0	\$187,841
Balance	\$1,232	\$5,713	\$79,577	\$94,533	\$94,533	\$94,533	\$370,121

**Congestion Mitigation and Air Quality Improvement Program (CMAQ):** Federal transportation legislation authorizes the State of California to spend Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds in air basins that are not in compliance with federal air quality standards. California distributes CMAQ funds to the metropolitan planning organizations (MPOs) based on population and the severity of non-attainment of air quality standards in a particular air basin. MTC pools the CMAQ funds coming to the San Francisco Bay Area with STP funds to develop a comprehensive and multi-modal program, the OneBayArea Grant Program. The CMAQ program funds programs that address air quality strategies, such as the Transportation for Livable Communities (TLC), the Bicycle and Pedestrian Program, Safe Routes to School, Climate Initiatives program, Freeway Performance Initiative program, and Clipper<sup>(SM)</sup> (universal fare card).

The amounts available for programming were provided by Caltrans and the Federal Highway Administration (FHWA). CMAQ apportionments for the SAFETEA extension period (FY 2008-09 through FY 2011-12) are fully programmed. While regional programs using CMAQ are already included, the county selected projects will be programmed through a TIP amendment at a later date, once the counties have completed their project solicitation and selection.

CMAQ	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$69,061	\$86,561	\$86,561	\$86,561	\$86,561	\$86,561	\$501,866
Programming	\$45,833	\$84,187	\$10,984	\$0	\$0	\$0	\$141,004
Balance	\$23,228	\$2,374	\$75,577	\$86,561	\$86,561	\$86,561	\$360,862

## State Funds

**SHOPP:** The purpose of the State Highway Operation and Protection Program (SHOPP) is to adequately maintain and operate the State Highway System. In accordance with Government Code Section 14526.5 and Streets and Highways Code Section 164.6, the SHOPP is a four-year program of projects with the purpose of collision reduction, bridge preservation, roadway preservation, roadside preservation, mobility or facilities related to the state highway system. The most recent programming is the 2012 SHOPP covering the four-year period from fiscal years 2012-13 through 2015-16, and like the RTIP, the SHOPP is updated every two years. The amount available for programming, and the actual programmed amount reflect the SHOPP funding available to the region as approved by the California Transportation Commission (CTC).

SHOPP	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$447,788	\$353,602	\$359,872	\$162,042	TBD	TBD	\$1,323,304
Programming	\$447,788	\$353,602	\$359,872	\$162,042	\$0	\$0	\$1,323,304
Balance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**Regional Transportation Improvement Program (RTIP):** The RTIP is a five-year capital improvement program of transportation projects on and off the State Highway System, funded with revenues from the Transportation Improvement Fund (TIF) and other funding sources. The RTIP comprises 75% of the State Transportation Improvement Program (STIP). Working from a California Transportation Commission (CTC) estimate based on population and road miles, MTC submits the Bay Area's RTIP. The RTIP is updated every two years. The amount available for programming, and the actual programmed amount reflect the County Share balances and programming targets of the 2012 STIP Fund Estimate, and funding committed to the region as adopted by the California Transportation Commission (CTC) on March 29, 2012. The next STIP cycle will be in 2014.

RTIP	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$162,103	\$20,595	\$54,040	\$97,304	\$45,507	TBD	\$379,549
Programming	\$162,103	\$20,595	\$54,040	\$97,304	\$45,507	\$0	\$379,549
Balance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

**Interregional Transportation Improvement Program (ITIP):** The ITIP is a five-year capital improvement program of transportation projects on and off the State Highway System, funded with revenues from the Transportation Improvement Fund (TIF) and other funding sources. The ITIP comprises 25% of the STIP and addresses transportation infrastructure needs that cross metropolitan boundaries and link the state's transportation system. The amount available for programming and the actual programmed amount reflect the STIP funding committed to the region adopted by the California Transportation Commission (CTC) on March 29, 2012. The next STIP cycle will be in 2014.

ITIP	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$760	\$22,284	\$65,610	\$0	\$0	TBD	\$88,654
Programming	\$760	\$22,284	\$59,773	\$0	\$0	\$0	\$82,817
Balance	\$0	\$0	\$5,837	\$0	\$0	\$0	\$5,837

## Local/Regional Funding

**Bridge Tolls (Tolls on state-owned bridges)** – Bridge Toll funding is funding generated from tolls collected on the seven state-owned toll bridges in the bay area. The Bay Area Toll

Authority (BATA) administers and allocates base toll revenues from the seven state-owned bridges to Caltrans for the day-to-day operations, maintenance and administration of these bridges, as well as their capital improvement and rehabilitation. BATA also serves as a pass-through agency for Regional Measure 2 (RM2) bridge toll funds to specific voter-approved projects to relieve traffic congestion in bridge corridors, earthquake retrofit of state-owned toll bridges and other traffic mitigation projects related to retrofit work. Other bridge toll funding programs include Regional Measure 1 (RM1) projects to relieve traffic congestion in bridge corridors; AB 664 Net Bridge Toll Revenues, which MTC's policy is to use to match federally funded transit capital projects that relieve congestion on the San Francisco-Oakland Bay, San Mateo-Hayward and Dumbarton bridges; and Two Percent Bridge Toll revenues, which are derived from the transit element of RM1 and fund specific ferry and non-ferry capital projects.

Bridge Tolls	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$629,011	\$632,132	\$635,268	\$638,420	\$641,588	\$644,773	<b>\$3,821,193</b>
TIP Programming	\$376,826	\$286,070	\$97,174	\$98,213	\$23,828	\$34,358	<b>\$916,467</b>
Committed to Maintenance /Debt Service/ ETC	\$252,185	\$346,062	\$538,094	\$540,207	\$617,760	\$610,415	<b>\$2,904,725</b>
Balance	\$0	\$0	\$0	\$0	\$0	\$0	<b>\$0</b>

**Other Local Funding** - Includes 1/2¢ Sales Tax for transit and other highway improvements in Alameda, San Francisco, Contra Costa, Santa Clara, San Mateo, Sonoma and Marin Counties. It does not include pending sales tax measure like the ones in Napa and Solano Counties. Other local funding also includes Garvee Bond financing by local agencies, gas tax subventions, and Transportation Development Act (TDA) Articles 4 and 8 (1/4-cent sales tax) for transit operating assistance and capital projects. Programming of local funding takes place as the discretion of local collecting agencies.

Other Local	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	Totals
Revenues	\$3,416,505	\$3,493,090	\$3,620,040	\$3,738,563	\$3,861,727	\$3,988,720	<b>\$22,118,645</b>
Programming	\$1,190,351	\$1,585,140	\$1,484,852	\$732,648	\$439,571	\$1,340,058	<b>\$6,772,621</b>
Balance	\$2,226,154	\$1,907,950	\$2,135,188	\$3,005,915	\$3,422,156	\$2,648,662	<b>\$15,346,024</b>

## Innovative Financing

**Advance Construction** – Advance Construction (AC) is a financial management tool used to advance projects to meet program goals and project delivery schedules using non-federal funds while remaining eligible for federal funding at a later date. Once federal funding becomes available AC projects may be converted in whole or in part to normal federal funding. The previously expended funds are then replenished by federal reimbursements.

**Grant Anticipation Revenue Vehicles Bonds** – The Grant Anticipation Revenue Vehicles (GARVEE) Bond program allows for the use of tax-exempt debt instrument financing mechanisms backed by federal appropriations to advance critical transportation infrastructure projects through the financing of right of way and construction costs. These projects must be eligible for GARVEE financing under State and Federal law and be designated for GARVEE financing by the California Transportation Commission (CTC). Additionally, projects financed in this way must have a completed project design and environmental clearance, including compliance with the National Environmental Protection Act (NEPA). In accordance with constitutional limitations, state funds may not be used for debt service payments on GARVEE

bonds. Future federal-aid funding is therefore used for debt repayment with state and local matching funds being used outside of debt service.

<b>GARVEE</b>	<b>FY 2012-13</b>	<b>FY 2013-14</b>	<b>FY 2014-15</b>	<b>FY 2015-16</b>	<b>FY 2016-17</b>	<b>FY 2017-18</b>	<b>Totals</b>
Revenues	\$89,100	\$16,100	\$16,100	\$0	\$0	\$0	<b>\$121,300</b>
Programming	\$89,100	\$16,100	\$16,100	\$0	\$0	\$0	<b>\$121,300</b>
Balance	\$0	\$0	\$0	\$0	\$0	\$0	<b>\$0</b>

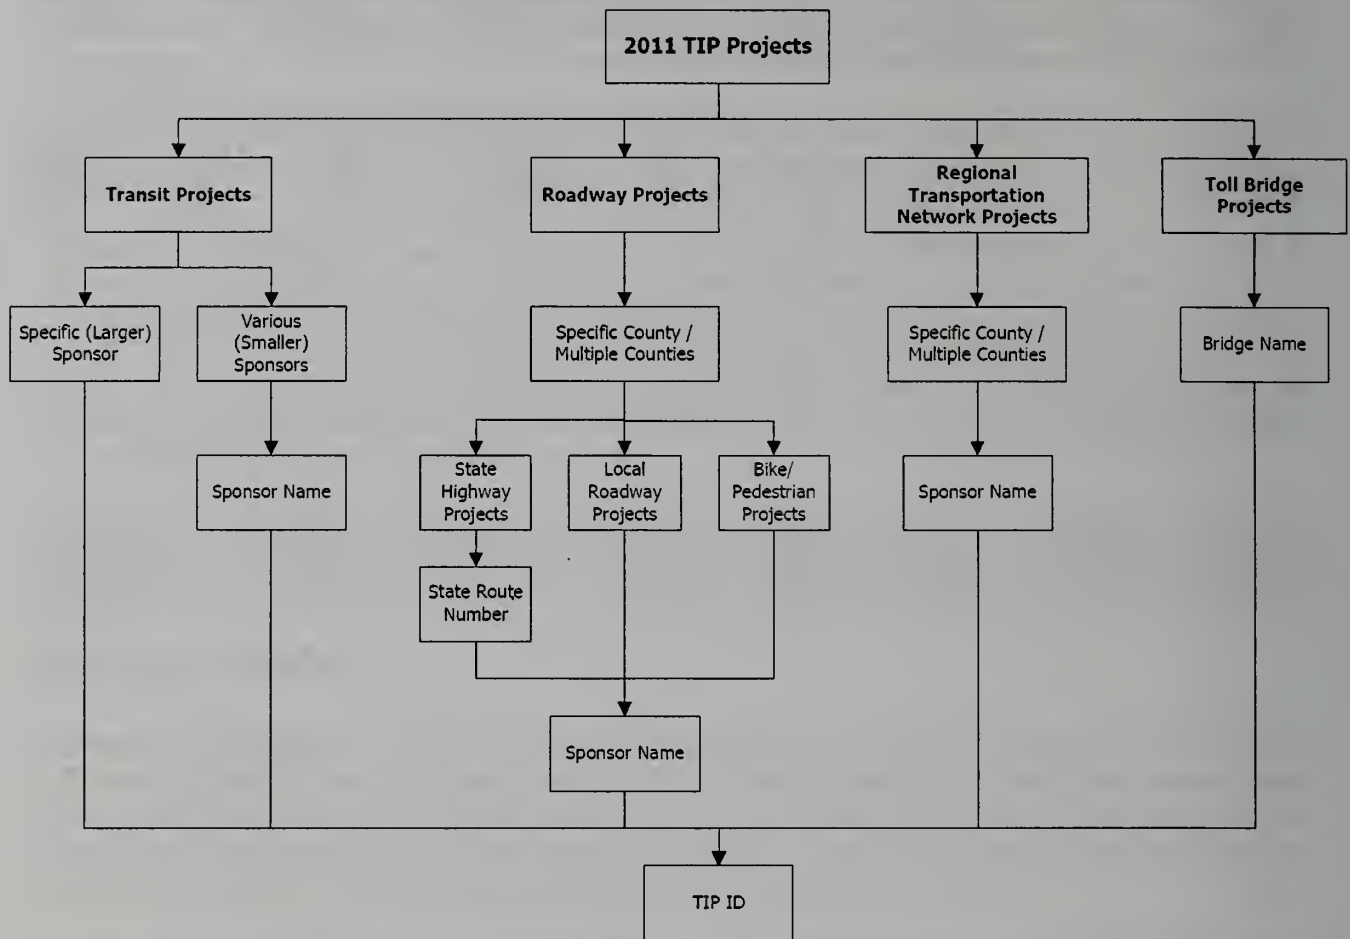

**Transportation Infrastructure Finance and Innovation Act** – The Transportation Infrastructure Finance and Innovation Act (TIFIA) provides federal credit assistance in financing surface transportation projects of regional and national significance costing a minimum of \$50 million or 33.3% of a state's annual appropriation of federal-aid funds, whichever is less. Intelligent Traffic System (ITS) projects have a lower requirement of at least \$15 million. Federal credit assistance under TIFIA in the form of secured loans, loan guarantees, or standby lines of credit provides more flexibility in repayment terms and potentially more favorable interest rates than private capital market alternatives.

<b>TIFIA</b>	<b>FY 2012-13</b>	<b>FY 2013-14</b>	<b>FY 2014-15</b>	<b>FY 2015-16</b>	<b>FY 2016-17</b>	<b>FY 2017-18</b>	<b>Totals</b>
Revenues	\$0	\$0	\$0	\$171,000	\$0	\$0	<b>\$171,000</b>
Programming	\$0	\$0	\$0	\$171,000	\$0	\$0	<b>\$171,000</b>
Balance	\$0	\$0	\$0	\$0	\$0	\$0	<b>\$0</b>

## How to Read the Project Listings

### Organization

Project listings provide a detailed description for each individual project listed in the 2013 TIP. The projects in the TIP are organized alphabetically by transit agency, followed by roadway projects listed alphabetically by county. Within each county's roadway project listing, the projects are sorted into state highway projects first (by route number), followed by local roadway projects sorted alphabetically by sponsor.

The 2013 TIP also includes indices at the beginning of Volume 1, Section 2 to assist in locating the page numbers on which each project is listed. The indices are organized by County and TIP ID.

## Key to Format

The detailed listing contains the following information for each project:

Project Information		
#	Data Label	Definition
1	TIP ID	A unique number used to identify projects in the TIP. The first three characters indicate the location where the project is being implemented and refers to either a specific county, various counties, or the entire region. The next two digits indicate the version of the TIP where the project was first shown (i.e. for projects appearing for the first time in the 2013 TIP these digits will be 13). The final four digits indicate the order in which the project first appeared in the TIP.
2	County	The county in which the project is located. Projects may also be located in "Various" counties or they may be "Regional" projects.
3	System	The transportation system for which the project improvement is attributed: public transit, local streets and roads, State Highway System or Interstate System, Port and Freight Rail Facilities, Public Lands and Trails, Toll Bridges and Express Lanes (Tollway), and Regional projects.
4	RTP ID	The RTP ID refers to the unique parent project as described in MTC's Draft Regional Transportation Plan.
5	CTIPS ID	A unique number used to identify projects in the California Transportation Improvement Program System (CTIPS)
6	Sponsor	The agency in charge of administering a project.
7	Co-Sponsor/ Implementation Agency	The agency administering or implementing a project in partnership with the Sponsor.
8	Project Name	The name or title of the project.
9	Project Description	A brief description of the project location and the scope of work being implemented.
10	Air Quality Exempt Code	The Air Quality Exemption status per federal Environmental Protection Agency (EPA). A list of Air Quality Exempt Codes may be found in Appendix A-45.
11	Route	The State Highway System (SHS) or State Route (SR) number (if applicable).
12	Post Mile From	The beginning limit of a project's location on the State Highway System or on a State Route (if applicable).
13	Post Mile To	The terminating limit of a project's location on the State Highway System or on a State Route (if applicable).
14	Toll Credits	The amount of Toll Credits being used on the project. More information on the use of toll credits may be found in Appendix A-20 and Appendix A-21.

### Funding Information

Please note that the years indicated in the funding information section of the project listing are shown as Federal Fiscal years. The Federal Fiscal Year (FY) in the TIP is from October 1 to September 30 of the following calendar year. The 2013 TIP covers the six-year period of FY 2012/13, FY 2013/14, FY 2014/15, FY 2015/16, FY 2016/17, and FY 2017/18.

#	Data Label	Definition
15	Phase	The stage of the project for which the specified funds have been programmed. Phases include: environmental (ENV), design engineering (PSE), preliminary engineering (PE), right of way acquisition (ROW), Caltrans support for right of way (ROW-CT), construction (CON), and Caltrans support for construction (CON-CT).
16	Fund Source	The program, law, or other source from which the specified funds originated. A list of all fund codes in use as of the adoption of the 2013 TIP, including the associated funding sources, may be found in Appendix A-39.
17	Prior Years	Funding programmed in years prior to the six years of the 2013 TIP (i.e. Federal Fiscal Year [FY] 2011/12 and earlier). These funds are shown for information only and are not part of the six years of the 2013 TIP.
18	The Six Years of the 2013 TIP	Funding programmed in years covered by the 2013 TIP.
19	Future Years	Funding programmed in years after the six years of the TIP. These funds are shown for information only and are not part of the six years of the TIP.
20	Total Programmed	The rows of the funding information table are calculated to show the total amount of funding from a given source programmed in a given phase. The columns are calculated to show the total amount of funding for all phases from all fund sources for a given year. The bottom left corner is calculated to show the total amount of funds programmed for a project inclusive of all fund sources, years, and phases.

## WEB PAGE ACCESS

### How to View the TIP on the Internet

The Metropolitan Transportation Commission (MTC) has placed the entire Transportation Improvement Program (TIP) on the Internet. This allows project sponsors and the general public to see what transportation projects are planned in their area and in the MTC region. ,

Individual project listings may also be viewed interactively with the latest information as the TIP is amended through MTC's online (web based) Fund Management System (FMS) at the web address:

[http://www.mtc.ca.gov/funding/fms\\_intro.htm](http://www.mtc.ca.gov/funding/fms_intro.htm).

To view the TIP on the Internet, the user will need a computer with Internet access capabilities or the user can visit any public library in the Bay Area and ask to use their Internet computer. Once on the startup page of the computer, type in the following Universal Resource Locator (URL) into the address line of the Web browser:

<http://www.mtc.ca.gov>

From MTC's Home Page, using the Site Index section on the left side of the screen and click on the word "*Funding*." This will take the user to MTC's Funding page. The TIP is listed as a feature on this page. Clicking on the "Transportation Improvement Program (TIP)" link will take the user to the TIP page. The user can also access the TIP page using the menu on the left side of the screen under "Funding".

From there the user can follow the on-line instructions to view actual TIP project listings or other portions of the TIP. For easier and faster access to the TIP, once on the startup page of your computer, type in the following URL into the address line and it will take you directly to the TIP Web page:

<http://www.mtc.ca.gov/funding/tip/index.htm>

For detailed information on individual projects, the particular project sponsor or lead implementing agency should be contacted directly.

### View Project Locations in the TIP Interactively

To meet new SAFETEA requirements regarding Visualization Techniques, some of the listed projects have been mapped to present the online reader with a visual location of the project. Some projects such as transit operations and maintenance projects, planning projects and studies cannot be are not mapped. To view the listed projects, visit the FMS application at: [http://www.mtc.ca.gov/funding/fms\\_intro.htm](http://www.mtc.ca.gov/funding/fms_intro.htm).

Once at the FMS homepage screen, select "Project Search," and click on "Search" button. It will bring up a complete list of the 2013 TIP projects. A list of all the TIP projects will be displayed. Projects that can be mapped interactively display a button in the left most column of the listing under the "Map It" header. By clicking on this button, a new window containing the project area map should appear.

If you have problems accessing MTC's on-line TIP, you can contact either:

Srikalyani Srinivasan

## Contacts for Questions About the TIP

For questions on the TIP, you may contact:

Srikalyani Srinivasan  
Phone: 510-817-5793  
Email: [ssrinivasan@mtc.ca.gov](mailto:ssrinivasan@mtc.ca.gov)

Or

Adam Crenshaw  
Phone: 510-817-5794  
Email: [acrenshaw@mtc.ca.gov](mailto:acrenshaw@mtc.ca.gov)

For detailed information on individual projects, the particular project sponsor or lead implementing agency should be contacted directly. General information on the transportation financing process can be found in two MTC publications, *Moving Costs: A Transportation Funding Guide for the Bay Area* and the *ABC's of MTC*. Both are posted on MTC's Web site at <http://www.mtc.ca.gov/library/>. Printed copies are available through the MTC/ABAG Library and may be ordered via e-mail [library@mtc.ca.gov](mailto:library@mtc.ca.gov), fax (510.817.5848) or telephone (510.817.5836).

## TIP- at- a-Glance

TIP-at-a-Glance provides a graphical summary of the number of projects, TIP funding and total project costs by mode, purpose and fund type for the entire region and each of the nine counties within the region. The charts and tables are on page 40 through page 44.

## Single Line Project Listing Reports

The following four single line project listing reports have been included as Appendix A-52.

1. Single Line Project Listing by County
2. Single Line Project Funding Report – Funding by Phase
3. Single Line Project Funding Report – Funding by Authority
4. Single Line Project Funding Report – Funding by Funding by Fiscal Year

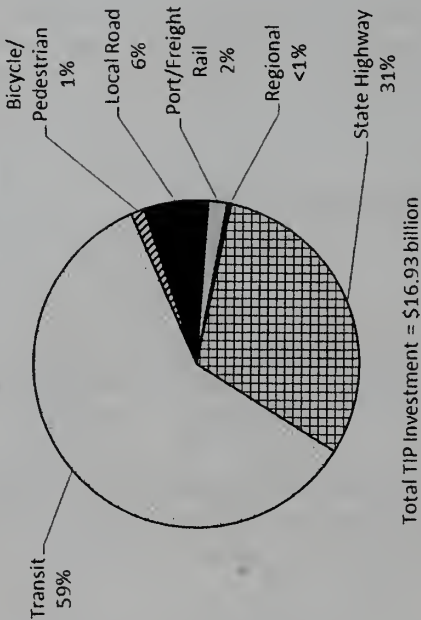

These reports include high level information as well as aggregated funding information about each project in a single line. They are divided by county with projects within each county sorted by project sponsor, transportation system, project purpose, and then TIP ID.

# **Transit Financial Capacity Assessment**

# 2013 TIP Financial Capacity Assessment Regional Summary

## Background

In the San Francisco Bay Area, there are over 20 public transit agencies consisting of bus, ferry boat, light rail, heavy rail, and paratransit service providers. The seven largest transit agencies represent 92 percent of the total transit costs in the Bay Area and carry 95 percent of the passenger trips. The table below provides a snapshot of operating and service statistics for Bay Area transit operators

**Table 1. San Francisco Bay Area Transit Provider Statistics\***  
(1,000s)

Operator	Service Characteristics	Annual Operating Budget	Annual Revenue Hours	Annual Passengers
AC Transit	Motor Bus	315,703	2,140	61,805
BART	Heavy Rail	482,895	1,904	111,303
Caltrain	Heavy Rail	95,359	185	12,673
GGBHTD	Bus and Ferry	111,919	409	8,719
SamTrans	Motor Bus	105,138	791	13,790
SFMTA	Bus, Cable Car, Light Rail	680,431	3,203	212,615
VTA	Motor Bus and Light Rail	293,819	1,635	42,236
Small Operators	Motor Bus, Ferry	164,219	1,419	19,788
Total		2,249,483	11,686	482,929

\*FY 2010-11 data taken from the 2012 Statistical Summary of Bay Area Transit Operators

The Bay Area economy is continuing to make gradual gains after the sharp downturn that began in Fiscal Year 2007-08. The recession necessitated significant cuts to transit services in order to match operating and capital budgets to available revenues. During the constrained financial environment from FY 2009 to FY 2011, transit agencies carefully examined their service and opportunities to reduce costs and improve productivity, where possible.

In 2010, MTC launched its Transit Sustainability Project (TSP), a two year, comprehensive effort to address long term sustainability of the region's transit system. The TSP goals are to improve the transit operators' financial condition, improve service to the customers and attract new riders to the system. In May 2012, MTC approved the TSP recommendations, including performance measures and targets, an initiative program that includes investment and incentive strategies for improving transit service, and additional customer-focused service, institutional, and paratransit recommendations.

## Projections – Transit Operating and Capital

As part of the Plan Bay Area development effort, MTC estimated the total cost to operate and maintain existing transit services over the 28-year plan period.

Over the next 28 years, operating and capital replacement costs for Bay Area transit providers are projected to total \$161 billion. This includes \$114 billion in operating costs plus \$47 billion for capital replacement. With existing dedicated revenues plus discretionary revenues directed towards transit by Plan Bay Area, MTC estimates that the region can fully address the operating needs for transit as well as fund 100 percent of vehicle replacements and approximately 70 percent of other essential transit capital rehabilitation and maintenance needs over the Plan period.

The projections developed for Plan Bay Area are appropriate for a long-range planning effort; however, they rely on fixed assumptions about economic factors and funding streams and do not take into account recent variations in revenue, and strategies undertaken to balance budgets in the short term. For the years covered by the 2013 TIP, MTC updated revenue projections to account for recent growth and worked with several transit operators to ensure that estimates of costs and revenues reflected existing short-range budgets and strategies for ensuring their *ability to operate and maintain their systems over the period covered by the TIP*.

To demonstrate the financial capacity of the Bay Area transit operators to provide on-going service at existing levels, MTC has provided annual information on operating costs and estimated revenues for each of the region's seven largest operators, and consolidated information for the region's small operators, who combined, make up approximately seven percent of total operating costs in the region.

Based on the Plan Bay Area projections, the table below shows the consolidated rehabilitation and maintenance needs of the region's transit operators in the table below.

**Table 2. S.F. Bay Area Transit Capital Core Rehab/Replacement Needs  
(1,000 YOE\$)**

Category	FY 2012-13	FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18	6-Year Total
Vehicles	162,383	448,004	330,602	458,867	381,129	587,685	2,368,669
Guideway Elements	84,240	558,709	236,418	124,074	842,297	128,271	1,974,008
<b>Total</b>	<b>246,622</b>	<b>1,006,713</b>	<b>567,020</b>	<b>582,940</b>	<b>1,223,425</b>	<b>715,956</b>	<b>4,342,677</b>

MTC estimates that approximately \$4.3 billion in transit capital maintenance needs exist within the 2013 TIP period. A projection of capital revenue summarized in the table below, shows that there is approximately \$4.5 billion available over the same time period. This summary does not include un-programmed regional discretionary funds that have been committed through Plan Bay Area to capital rehabilitation and or expansion projects. Of the total available, nearly half comes from non-Federal sources. The amount of revenue that is above and beyond the amount need to maintain core assets can be used to address other capital maintenance needs on the existing system or to provide local matching funds for other capital projects contained in the TIP. Not included in the revenue assumptions below, are regional discretionary funds that have been committed through Plan Bay Area to assist with capital transit needs.

Also provided within the individual operator assessments is a summary of each of the seven large operators' individual capital maintenance needs for core assets, and a consolidated summary of the capital maintenance needs for the region's smaller operators.

## Conclusion

Attachment A lists the major transit capital projects included in the 2013 TIP. There are approximately \$18 billion in planned transit capital projects over the six year period. Of the total, about 20 percent of the funding is assumed to come from Federal sources. Many operators have already assumed local match requirements within their projected operating expenses. Those funds, combined with funding contained in Table 3 above, are sufficient to meet capital match requirements.

Based on the information summarized above and detailed in the following assessments, the San Francisco Bay Area transit agencies generally have the financial capacity to operate transit service and meet capital match requirements over the period covered by the 2013 TIP. As noted later, Caltrain is projecting future operating deficits and is working with member agencies on possible revenue enhancement strategies. SamTrans also has a modest deficit over the six year period and is working on cost saving and service improvement initiatives. Further, as a member of Caltrain's Joint Powers Board, SamTrans is expected to benefit financially to any successful implementation of Caltrain's revenue enhancement strategies

## **Alameda Contra Costa Transit District (AC Transit)**

### **Operator Background & Budget**

The Alameda-Contra Costa Transit District, the third-largest public bus system in California, operates a fleet of 632 vehicles on 78 local and 31 transbay routes that serve 13 East Bay cities and adjacent unincorporated areas in Alameda and Contra Costa counties. The routes connect with nine other public and private bus systems, 21 Bay Area Rapid Transit stations, six Amtrak stations, three ferry terminals, and Oakland International Airport.

East Bay Paratransit Consortium provides ADA paratransit service in the East Bay. The consortium has entered into a contract with a broker to provide the necessary paratransit services. Operating costs are split between AC Transit and BART.

AC Transit's multi-year budget projections show that operating costs generally increase at the level of inflation. Recently negotiated labor agreements and compensation changes implemented for non-union and contracted employees have helped to control operating costs. In addition, labor reductions resulting from the closure of two facilities – one maintenance and one paratransit – created additional savings.

AC Transit's budget projections also show that revenues are keeping pace with expenses. Farebox revenue and sales tax-based receipts have shown a significant recovery since December of 2011 and are projected to grow at a modest but steady rate. Ridership numbers are close to the levels that existed prior to cuts in service in March 2010.

The improved budgetary outlook has led to the cancellation of service reductions that had been planned for FY 2012-13. Further financial support is anticipated from a county-wide sales tax measure that would add approximately \$20 million annually, on top of existing revenues, to both the operating and capital maintenance budgets. The sales tax is anticipated to go before the voters in Alameda County in 2016. Anticipated revenue from the sales tax have not been included in this financial capacity assessment.

### **Assessment**

#### *Operating*

AC Transit anticipates a cumulative balanced budget over the period of the 2013 TIP. A summary of the operating financial capacity assessment is provided in the table below. The analysis assumes the transfer of approximately \$30 million from the capital budget to preventive maintenance (an operating expense) over the TIP period. AC Transit intends to fulfill its near term capital rehabilitation and replacement needs with the use of Proposition 1B funds, allowing them to redirect a portion of the Federal Transit Administration funding for operating needs. The local matching funds from non-federal or state sources that are required for projects listed in the 2013 TIP have been accounted for within AC Transit's operating costs.

## Bay Area Rapid Transit District (BART)

### Operator Background & Budget

BART operates rail service on four Transbay routes and one route in the East Bay. The system operates 669 rail cars on 104 miles of track and 44 stations. The San Francisco Airport (SFO)/Millbrae extension opened in June 2003 and the West Dublin/Pleasanton infill station in February 2011. Currently, there are 62 trains online during the peak. The peak train requirement is anticipated to remain stable through FY 2017; however, train sizes will be rebalanced as needed to accommodate patronage growth. BART's latest SRTP was adopted in September 2007.

Operating revenue sources for FY 2013 are projected to increase by \$52 million over the adopted FY 2012 budget, due to strong ridership and sales tax growth during FY 2012. BART estimates that average weekday trips for FY 2012 will be 365,510, 4.8% over what was budgeted for that year. The FY 2013 preliminary budget estimates that average weekday trips will be 7.9% higher than what was budgeted for FY 2012. Fare revenue is expected to grow at an average rate of approximately 4% over the TIP period due to a combination of growth in passengers and planned biennial fare increases to keep pace with inflation.

Operating expenses are expected to grow at about 3% on average during the TIP period. Labor contracts negotiated in 2009 resulted in anticipated savings of roughly \$100 million over the subsequent four year period. BART's FY 2013 Preliminary Operating Budget proposes a moderate increase in staffing of 62 operating positions to ensure the District continues to operate reliably and efficiently.

BART's near-term budgets anticipate transfers from operating to capital to cover local match needs, amounts necessary to meet the BART match for Phase I of the Rail Car Replacement Program, and allocations to cover debt service requirements.

### Assessment

#### *Operating*

BART projects sufficient revenues to cover operating expenses over each year of the 2013 TIP period. Approximately \$219 million in revenues is projected to be made available for capital replacement. A summary of the operating financial capacity assessment is provided in the table on the next page.

## Peninsula Corridor Joint Powers Board (Caltrain)

### Operator Background & Budget

The Peninsula Corridor Joint Powers Board (JPB) — consisting of representatives from San Francisco, San Mateo, and Santa Clara counties — operates Caltrain, which provides commuter rail service between San Francisco and San Jose with additional service to Gilroy in southern Santa Clara County. Under contract with TransitAmerica Services Inc., the system currently operates 86 weekday trains but is proposing to increase to 92 trains in the Winter of FY 2013, to satisfy passenger demand.

Although ridership on Caltrain is at a historic level and fare revenues account for over 50% of Caltrain's operating revenue, existing revenues are not sufficient to meet projected operating expenses. Caltrain does not have a dedicated source of operating revenue similar to most operators that receive sales-tax based revenue and subsidies. The agency relies on JPB member contributions to fund a significant portion of their operating costs; however, JPB members have indicated that they may not be capable of maintaining financial support of Caltrain due to their own financial conditions. Caltrain's financial plan anticipates operating deficits in the last three years of the TIP period unless additional revenues are made available.

Currently, JPB members are involved in discussion on a cost sharing formula as well as working on developing a permanent, dedicated revenue stream to fund Caltrain operations. A possible long term solution is a sales tax measure that could be presented to voters in November 2014. This is still under discussion.

In addition to finding new revenue solutions, a key strategy for improving Caltrain's efficiency and gaining additional passengers is to modernize the system. Electrification of the system between San Francisco and San Jose will improve Caltrain's limited capacity to run additional trains and carry more passengers, thereby improving fare revenue. On March 28, 2012, MTC approved an agreement and established a funding framework among MTC, the California High Speed Rail Authority, the JPB, the SFCTA, the SMCTA, VTA, the City of San Jose, the City and County of San Francisco, and the TJPA, for a High Speed Rail Early Investment Strategy that includes electrification. Electrification is expected to be completed by 2019.

### Assessment

#### *Operating*

A summary of the operating financial capacity assessment is provided in the table below. Caltrain anticipates a cumulative operating deficit of \$87 million over the period of the TIP. JPB members are currently discussing options to fund Caltrain's operating costs through a combination of a revised JPB member cost sharing formula and the development of a long-term, permanent revenue stream.

## Golden Gate Bridge Highway and Transit District (GGBHTD)

### Operator Background & Budget

*The Golden Gate Bridge, Highway and Transportation District (GGBHTD) is a special district of the State of California that operates and maintains the Golden Gate Bridge and provides transit service between and within Marin, Sonoma and San Francisco Counties. Historically, approximately 40% of the annual cost of operating Golden Gate Transit was subsidized by tolls collected on the Golden Gate Bridge.*

Golden Gate has sufficient revenues to meet operating needs within the six years included in the 2013 TIP. Operating costs are projected to grow at approximately two percent annually, and fares are projected to remain relatively flat. Golden Gate continues to receive toll-revenue subsidies in order to meet operating expenses.

*In an effort to reduce the reliance on toll revenues, Golden Gate continues to work on implementing deficit reduction initiatives contained in the District's ten year Financial Plan. Examples of these initiatives include the elimination of duplicative bus/ferry trips, reduction of bus and ferry fare discounts, ferry parking fees, and other cost control measures.*

### Assessment

#### *Operating*

A summary of the operating financial capacity assessment for Golden Gate is provided in the table below. Golden Gate anticipates balanced budget for each year included in the 2013 TIP.

## San Francisco Municipal Transit Agency (SFMTA)

### Operator Background & Budget

San Francisco Municipal Transportation Agency (SFMTA) operates 74 transit lines over an approximately 47-square-mile service area. SFMTA provides service by five modes: buses, trolley coaches, light rail, cable car, and paratransit and carried an estimated 213 million passengers in FY 2011-12. SFMTA carries approximately 44% of the total passenger transit trips within the region.

San Francisco contributes close to \$250 million of general fund, parking and development fee revenues to support SFMTA's approximately \$700 million operating budget. Farebox revenues provide for approximately 30% of SFMTA's annual operating budget.

SFMTA projects that there are sufficient revenues to meet operating needs within the six years included in the 2013 TIP. To ensure long term sustainability, the SFMTA Board adopted a five-year strategic plan. The framework for this plan focuses on a new vision and mission for the agency and the goals and objectives needed to achieve this vision. The four main goals of the plan are to create safer transportation experience for everyone, make non-automobile modes the preferred means of travel, improve the environment and quality of life in San Francisco, and to create a workplace that delivers outstanding service.

### Assessment

#### *Operating*

SFMTA projects sufficient revenues to cover operating expenses over each year of the 2013 TIP period. Approximately \$79 million in revenue is projected to be made available for capital expenditures. A summary of the operating financial capacity assessment is provided in the table below.

### Capital

SFMTA's capital program in the 2013 TIP is focused on strategic expansions of its light rail service and bus rapid transit routes as well as capital asset rehabilitation and replacement project. SFMTA's projected core capital maintenance needs for the period covered by the TIP is provided in the table below. It is projected that there is sufficient funding available through the Federal program, in combination with local and state sources, to maintain the system in its current state of repair

## San Mateo County Transit District (SamTrans)

### Operator Background & Budget

SamTrans operates fixed-route bus service and contracts with MV Transit for operation of some routes. SamTrans has a total fleet of 324 buses, providing more than 13.2 million annual trips in San Mateo County. SamTrans also owns a fleet of 64 demand-response vehicles that provide SamTrans' ADA-compliant paratransit service. In addition to its own bus service, SamTrans provides the staff as well as financial subsidies for the Caltrain commuter rail service.

In 2009, SamTrans restructured its service and now operates 48 fixed routes. 16 routes serve San Mateo County's six BART stations and 19 routes serve Caltrain stations.

Since 2003, SamTrans has collaborated with BART to provide rapid rail transit service by committing to fund a portion of the capital and operating costs associated with the extension of BART service into San Mateo County.

SamTrans' operating costs in the 2013 TIP period are declining or not growing as fast as a result of reducing the level of contribution provided to Caltrain, beginning in FY 2011. SamTrans is leading discussions with other JPB members to find alternatives for on-going funding support for Caltrain. Beyond FY 2014, SamTrans' operating costs are projected to grow at roughly the pace of inflation. Fare revenues are also projected to grow at a modest rate of approximately three percent annually.

As seen in the table below, SamTrans' budget is balanced in the first four years covered by the TIP; however, the agency has acknowledged a structural deficit that requires the contribution of approximately \$11 million per year on average, in sales tax operating reserves in order to cover operating expenses. These reserves are expected to be exhausted by FY 2017. To address this deficit, SamTrans is continuing to focus on implementing cost saving and service improvement elements of their strategic plan. One initiative contained in their strategic plan, the SamTrans Service Plan (SSP), is an in-depth study of their fixed route bus system. The purpose of the study is to determine how SamTrans can continue to best serve its customers given existing revenue streams. Stated goals of the SSP include the investment of resources where they will have the maximum benefit to customers and to increase efficiency and effectiveness of SamTrans service.

### Assessment

#### *Operating*

SamTrans projects a balanced budget over each year of the 2013 TIP period as a result of using agency reserves. A summary of the operating financial capacity assessment is provided in the table below. The local matching funds from non-federal or state sources that are required for projects listed in the 2013 TIP have been accounted for within SamTrans' operating costs.

**Capital**

Funding for SamTrans' bus and ADA-related capital replacement projects is from federal sources included in the TIP. The balance of SamTrans' capital program (for matching funds and for locally funded projects) is available from county sales-tax generations and reserves. SamTrans' projected core capital maintenance needs for the period covered by the TIP is provided in the table below. It is projected that there is sufficient funding available through the Federal program, in combination with local and state sources, to maintain the system in its current state of repair.

## **Santa Clara Valley Transportation Authority (VTA)**

### **Operator Background & Budget**

VTA operates 424 motor bus coaches and 99 light rail vehicles on 77 routes throughout an urbanized area of 326 square miles. 19 core bus routes, including one Bus Rapid Transit route, form the backbone of the system. 16 local bus routes and 17 Community Bus and 11 Shuttles feed into the rest of the transit system; VTA's shuttle routes connect light rail and Caltrain stations with industrial areas and San José State University. 12 Express bus routes offer weekday commuter service. VTA operates three light-rail transit lines that total 42 miles in length, serving 62 stations. Together, these services served over 42 million passengers in FY2011-12.

Although VTA bus and light-rail services are accessible to individuals with disabilities, a separate ADA paratransit service provides over 826,000 trips each year for people in the county who cannot use conventional transit.

VTA is a member of the Peninsula Corridor Joint Powers Board. VTA also contracts with the Altamont Commuter Express (ACE) for service. Each provides commuter rail service to Santa Clara County from adjacent counties, and shuttle vans from their stations to destinations within Santa Clara County. VTA belongs to the Highway 17 Express and Dumbarton Express consortium that provide express bus service into Santa Clara County from other adjacent counties.

In 2000, Santa Clara County voters approved Measure A, a thirty-year sales tax to fund transit operations and capital expansion. In 2008 Santa Clara County voters also approved an additional 1/8th cent sales tax to support operation of the BART extension.

In 2008, VTA completed a Comprehensive Operations Analysis (COA) and established a Transit Sustainability Policy for the agency that culminated in the restructuring of bus service to attract additional riders.

VTA has sufficient revenues to meet operating needs within the four years included in the 2013 TIP. Operating costs are projected to grow at an average of about three percent per year over the six year period. Fare revenues are also projected to grow at about seven percent per year on average.

### **Assessment**

#### *Operating*

VTA projects sufficient revenues to cover operating expenses over each year of the 2013 TIP period. Approximately \$266 million in revenues is projected to be made available for capital expenditures. A summary of the operating financial capacity assessment is provided in the table below.

## San Francisco Bay Area Small Operators

Collectively, the San Francisco Bay Area's 17 smaller transit operators account for only seven percent of the total transit operating costs in the region and only five percent of fixed route transit passengers in the region.

### Assessment

#### Operating

The financial capacity assessment for the seventeen San Francisco Bay Area small operators, combined, is shown in the table below. In total, the small operators have sufficient funds to operate at existing service levels over the period of the 2013 TIP.

# Alameda County

## Overview

Alameda County is the second-largest county in the Bay Area, with a population of over 1.5 million people. As the geographic center of the Bay Area, Alameda County is faced with a number of diverse transportation demands, ranging from deteriorating infrastructure and pavement rehabilitation needs to the need for selective expansion of the transit, bicycle, pedestrian and roadway systems to meet growing demand. Transportation is a high priority for residents. Since 1986, Alameda County has had a half-cent sales tax measure to provide funding for a variety of transportation improvements.

Alameda County typically dominates the Top 10 congested corridors in the nine-county Bay Area Region and claimed five of the top ten spots in the most recent MTC *State of the System* report. The five Alameda County freeway segments included in the Top 10 are located along I-80, I-580, and State Route 92. The congestion in Alameda County is compounded by the large amount of vehicle, rail and freight travel through Alameda County between the origins and destinations of San Joaquin, Contra Costa, Santa Clara, San Francisco and San Mateo counties.

## Alameda County TIP Projects

The Alameda County projects in the 2013 TIP are targeted to improve the quality and efficiency of the county's transportation system. The county's specific transportation needs are identified in the Regional Transportation Plan as well as Alameda County's Countywide Transportation Plan and Countywide Bicycle and Pedestrian Plans. The funding for the Alameda County TIP projects comes from a variety of local, regional, state, and federal funding.

The distribution of project types throughout the county reflects the diverse transportation needs in Alameda County. In the northern part of the county, a higher percentage of transit usage requires a large investment in transit rehabilitation and capital, directed towards the Alameda-Contra Costa Transit District (AC Transit) and the Bay Area Rapid Transit District (BART). Funding has also been targeted towards important transit improvements throughout the county, such as the AC Transit Bus Rapid Transit (BRT), the BART connector to the Oakland International Airport and the BART Extension to Warm Springs.

Several major highway expansion projects are programmed in the TIP. These include, in northern Alameda County, HOV and safety improvements to the I-880 corridor and operational improvements to the I-80 corridor, and in eastern Alameda County, HOV/HOT lane improvements to the Sunol Grade segment of I-680 and HOV/HOT lane and transit access improvements to the I-580 corridor in the Livermore Valley. To increase the use of alternative modes, additional funding is also available for Transit Oriented Development (TOD) projects and various bicycle and pedestrian improvements throughout the county. Fund sources such as Safe Routes to School and Transportation Enhancement funds are used to construct amenities including pedestrian plaza improvements at BART stations and bicycle path gap closures around the county.

# Contra Costa County

# Contra Costa County

## Overview

While the Bay Area has more than doubled in population since 1950, Contra Costa County has grown even faster, more than tripling in population between 1950 and 2010. ABAG now estimates that Contra Costa has a population of about 1,038,711 people with about 344,922 jobs. Contra Costa is forecast to add 293,495 residents between 2010 and 2040, a 28 percent increase. Job growth in Contra Costa is expected to be even more substantial, adding 122,924 new jobs, a 36 percent increase.

The Contra Costa Transportation Authority (CCTA) serves as the Congestion Management Agency (CMA) for the county. As the CMA, CCTA prepares a Congestion Management Program and updates it biennially, prepares a recommended list of projects for funding through the State Transportation Improvement Program (STIP), and works with other CMAs and regional and State agencies to address transportation and growth management issues in the region and the State. CCTA also manages Measure J, the 2004 half-cent sales tax that succeeded 1988's Measure C, which first established Contra Costa's transportation improvement and growth management program. Measure J, which began on April 1, 2009, extended the sales tax for another 25 years.

## The Vision for Contra Costa

CCTA, as part of its 2009 *Countywide Comprehensive Transportation Plan (CTP)*, has adopted the following vision for the county's future:

Strive to preserve and enhance the quality of life and promote a healthy, strong economy to benefit the people and areas of Contra Costa that is sustained by 1) a balanced, efficient transportation network; 2) cooperative planning; and 3) growth management. The transportation network should integrate all modes of transportation to meet the diverse needs of Contra Costa.

Achieving the vision will require CCTA to find the right balance among the different, and sometimes competing, needs of Contra Costa's residents and businesses, including:

- Completing and expanding the regional system of roads, transit and pathways while ensuring that the existing system is well maintained;
- Balancing the needs of through-traffic with the access needs and quality of life of adjoining neighborhoods and business areas;
- Recognizing the differing needs and situations of Contra Costa's subareas while developing a comprehensive approach to transportation systems;
- Recognizing that while new highway capacity will not in the long run eliminate congestion, adding capacity for automobiles where beneficial; and
- Supporting and encouraging the use of transit, carpools, bicycles and walking.

Finding the right balance among these needs will require cooperation among the jurisdictions of Contra Costa and the support of residents and the business community.

## Contra Costa TIP Projects

The projects in the proposed TIP support the four goals CCTA has adopted:

- Enhance the movement of people and goods on highways and arterial roads;
- Manage the impacts of growth to sustain Contra Costa's economy and preserve its environment;
- Expand safe, convenient and affordable alternatives to the single-occupant vehicle; and
- Maintain the transportation system.

**Enhance Movement on Highways and Arterial Roads.** Probably highest-profile project in the TIP focused on enhancing vehicular movement is the Caldecott Tunnel 4th bore. The fourth bore will remove a major bottleneck in the highway system in the region and will reduce congestion in the off-peak direction on SR 24, and is currently under construction. The 2013 TIP also includes several components of the State Route 4 Bypass, including new interchanges at Sand Creek and Balfour Road and the widening of the roadway between the two interchanges. In addition, the 2013 TIP includes several HOV projects including direct HOV ramps at the I-680/Norris Canyon Road interchange and HOV lane gap closure on southbound I-680 through the SR4 interchange.

Numerous arterial and interchange improvement projects are also planned to relieve congestion and improve circulation on city streets. In West County, these projects include the Marina Bay Parkway Grade Separation in Richmond and improvement of the I-80/San Pablo Dam Rd. interchange in San Pablo. In Central County, they include the Commerce Avenue Extension in Concord and Phase II of the widening of Buskirk Avenue in Pleasant Hill. East County projects include the widening of California Avenue in Pittsburg and Main Street in Oakley. In Southwest County, projects include intersection improvements at Crow Canyon and Camino Tassajara in Danville.

**Expand safe, convenient and affordable alternatives to the single-occupant vehicle.** The TIP includes a large number of projects that support the transit system. The projects include the Eastern Contra Costa BART Extension, or eBART, which will construct a connecting transit service from Antioch westward to the existing Pittsburg/Bay Point BART station. Other improvements include the replacement of vehicles in the WestCAT and Tri Delta systems and the construction of park-and-ride facilities and transit stations. The latter include work on Martinez and Hercules Intermodal Stations, east side improvements at the Richmond Intermodal Station and work on park-and-ride lots serving the Tri Delta system. The various HOV improvements mentioned above will also support this goal.

The 2013 TIP also programs funding for a number of pedestrian and bicycle projects that will close gaps and improve pedestrian and bicyclist safety in Contra Costa. These include projects such as bicycle lanes on Barrett Avenue in Richmond, streetscape improvements near the El Cerrito Plaza BART station, and improvements to the pedestrian and bikeway network in the Monument Corridor in Concord.

# Marin County

# Marin County

## Marin County TIP Projects

Although Marin is usually thought of as a suburban residential and recreational area, ranching and dairy farming are major features of the rural areas of West Marin. Industry in the county includes movie and video production, computer software, communications equipment, printing, and the manufacture of plastic products, ceramics, candles, and cheese.

Marin County is linked to San Francisco by the Golden Gate Bridge and to the East Bay by the Richmond-San Rafael Bridge. It is bordered on the north and northeast by Sonoma County and on the west by the Pacific Ocean. Marin is the slowest growing county in the region in terms of population. Marin currently has approximately 250,000 residents. Marin residents prefer to retain the county's small town atmosphere and have established strong policies against development outside the urban corridor. Over 90 percent of the growth anticipated in Marin County will occur within the urban corridor, along Highway 101.

To address Marin County's most immediate transportation needs, residents, elected officials and planners agreed, after extensive public meetings, that local funding was indispensable. As a result, Measure A, a ½ cent transportation sales tax, was approved on the November 2, 2004 ballot, generating approximately \$20 million annually for 20 years. In addition to the sales tax measure, Marin County has aggressively tapped into other regional, state, and federal funds to achieve the county's transportation goals.

Local matching funds will also help Marin County develop and implement plans to provide a variety of quality multi-modal transportation options for Marin residents, including improved bicycle and pedestrian access, senior mobility, and enhanced transit services. In addition, voters in Marin and Sonoma passed Measure Q in 2008 to increase a one-quarter percent sales tax for the Sonoma Marin Area Rail Transit (SMART) to provide commuter rail for North Bay residents. With the passage of Measure Q, SMART now moves from the conceptual stage toward the building stage. Construction activities started in 2012, with train service now scheduled to begin in FY 2016.

Other notable projects of regional significance in Marin County include:

- **Marin Sonoma Narrows (MSN)** - The overall project scope includes upgrading the facility from expressway to freeway, extending 16 miles of HOV from SR-37 in Novato, Marin County to north of Corona Road Overcrossing in Petaluma, Sonoma County; constructing new interchanges, frontage roads and pedestrian/bicycle facilities; and installing traffic operation system (TOS) improvements such as traffic monitoring stations and ramp metering on mainline and ramps. Environmental document for this project was approved in October 2009. Construction of first contract of Phase 1 started in July 2011 and construction of additional contracts began in fall 2012.
- **Central Marin Ferry Connection Multi-use Pathway Project** – Located in the City of Larkspur, this project will create a new Class 1 facility following the County's north-south greenway, which is generally located within the Sonoma Marin Area Rail Transit (SMART) District's right-of-way. The project is intended to further promote non-motorized commute alternatives and enhance recreational travel while providing safe, direct and convenient pedestrian/bicycle access between local transit facilities, schools,

business centers and residential communities. The new path will directly connect the recently completed Cal Park Hill Multi-Use Pathway with an existing east/west multi-use path along Sir Francis Drake Boulevard.

- **Highway 101 Greenbrae/Twin Cities Corridor Improvement Project** – This project will improve traffic operations and relieve congestion for multiple travel modes along the US Highway 101 corridor between the Town of Corte Madera and City of Larkspur. The US 101 Greenbrae corridor is a critical link for both local and regional traffic in Marin County. This corridor segment currently experiences major traffic congestion in the am and pm peak periods due to operational deficiencies. The corridor was listed in the top ten worst roadways for congestion in the San Francisco Bay Area (MTC, 2006). This project is funded, in part, with Regional Measure (RM) 2 funds and is currently in the environmental review phase. The draft environmental document is scheduled to be finalized in 2013.

# Napa County

# Napa County

## Napa County TIP Projects

Napa County has the lowest population in the Bay Area – 136,484 – about half the size of Marin and one-thirteenth the size of Santa Clara. It is a primarily agricultural county world renowned for the quality of its vineyards and the wines they produce.

This bucolic county attracts five million visitors each year to drink local wines, dine at world-class restaurants, and enjoy the restful scenery. The County voters and policy makers have embraced and adopted Smart Growth and agricultural preservation policies, including the first formal agricultural preserve in the country, which have yielded the protection of the rural character of Napa County. Napa County voters also approved a transportation sales tax in 2012 to begin generating funds in 2018.

Five million tourist visits each year – concentrated in a few months – put a good deal of pressure on the transportation system in the Napa Valley when added to the normal travel needs of the residents and business. There is a good system of roads, but maintaining and improving the roadways is a challenge and safety improvements are needed in several locations. The successful rural transit service includes service to all of the cities (including extensive service in the City of Napa), connecting service to Sonoma and Solano Counties (Solano services set to begin in 2013), the BayLink Ferry in Vallejo and to the El Cerrito Del Norte BART station in Contra Costa County. A new multimodal transit center in Napa opened in 2013 and route coverage and hours of service are being revised to achieve greater efficiencies. An extensive bicycle network as been carefully planned but is presently incomplete and could benefit from additional constructed routes. A major north/south Class One “Napa Valley Vine Trail” is being pursued by a broad coalition of citizens, local organizations and local governments.

The projects in the TIP work on all of these areas. There are several miles of bicycle lanes and paths. The transit network benefits with new vehicles and several rehabilitated ones, new transfer centers, and increased operating funds. The roadway network gets new paving in several well-used locations, safety improvements in some key locations, and some capacity increasing projects. Improvements to the Napa County highway system includes interchange improvements at SR-12/29/221 intersection, and the widening of SR-12 through Jameson Canyon. The SR-12 Jameson Canyon project, currently under construction, is cooperatively funded with State Transportation Improvement Program (STIP) and Proposition 1B Corridor Mobility Improvement Account (CMIA) funds, and will bring much needed congestion relief on this corridor linking Napa County to Interstate 80 to the east. Additionally, the NCTPA is working to develop the Hwy 29 HOV/BRT corridor between Napa and Vallejo in the next RTP.

The projects in the TIP will improve the safety, access, and mobility of the multimodal transportation system in the Napa communities.

# San Francisco County

# City and County of San Francisco

## San Francisco TIP Projects

The 2013 TIP provides funding for a variety of projects in San Francisco over the next six years which will improve safety and mobility for City residents, workers, and visitors; improve air quality; reduce greenhouse gas emissions; and provide necessary infrastructure for anticipated housing and job growth.

Major transit projects in the TIP include the electrification of Caltrain and construction of a new Transbay Transit Center that will serve as the northern terminus of the proposed California High Speed Rail project. The latter entails the development of a blended high-speed rail system, coordinating high speed rail construction and operations with existing passenger rail services (e.g., Caltrain in the San Francisco Peninsula corridor). The San Francisco Municipal Transportation Agency (SFMTA) is nearing completion of final design and right of way acquisition while working on selected advanced construction elements for the Central Subway Project. The project will extend the Third Street Light Rail service, which connects the Visitacion Valley and Bayview Hunters Point neighborhoods to the Caltrain terminus at the ballpark in the South of Market (SOMA) area, to the Financial District and Chinatown.

The San Francisco County Transportation Authority (Authority), working in close coordination with the SFMTA, has released the Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the Van Ness Avenue Bus Rapid Transit (BRT) project and is planning on selecting a Locally Preferred Alternative (LPA) in spring 2013, incorporating significant analysis and public feedback on the Draft EIS/EIR. The Final EIS/EIR, which will analyze the selected LPA, is scheduled to be certified in 2013. The Authority, in partnership with the SFMTA, is also continuing to work on the Draft EIS/EIR for the Geary Boulevard BRT project. The Draft EIS/EIR is currently scheduled to be released in 2013. The proposed BRT projects would provide high-quality rapid transit service that would reduce travel time, increase reliability, and improve passenger comfort. Anticipated elements of San Francisco's BRT network include dedicated bus lanes, transit signal priority, all-door boarding and proof of payment, reduced stop spacing, real-time bus arrival information to riders, high quality bus stations, and pedestrian / streetscape improvements and amenities to improve access for pedestrians and bicyclists to the transit stations.

The TIP also includes significant funding for the Presidio Parkway Project, which would replace the structurally deficient Doyle Drive, the southern access to the Golden Gate Bridge on US 101 connecting San Francisco to Marin and the North Bay. Originally constructed in 1936 with narrow lanes, no median, and no shoulders, Doyle Drive is approaching the end of its useful life and its replacement is a priority safety concern for San Francisco and the Bay Area. The Presidio Parkway Project's final environmental document was certified on December 16, 2008. The construction phase began in August 2009. Phase 1 of the project is nearing completion and motorists are now driving on a seismically safe, temporary bypass until Phase 2 is completed. In May 2010, the California Transportation Commission approved a proposal to construct Phase 2 of the project through a public-private partnership. Phase 2 will be complete in 2015.

Since the last TIP update, San Francisco efforts have increased to improve transportation demand management (TDM) activities in order to improve air quality and reduce greenhouse gas emissions. In addition to traditional employer-based TDM activities such as providing ridesharing, commuter benefits, and emergency ride home programs, San Francisco is also exploring more innovative efforts. For example in mid-2010, the SFMTA launched the pilot phase of its SFpark project, which uses innovative technology and advanced pricing strategies to manage San Francisco's parking supply. In 2010, the Authority adopted its Mobility, Access and Pricing Study, which looked at area-pricing. Follow-up work continues related to evaluating the feasibility and effectiveness of area-pricing. The Authority has also initiated a TDM Partnership Project, which seeks to coordinate existing and potential new TDM policies and programs across multiple San Francisco agencies and provides improved planning and management capacity to support the private shuttles sector and to integrate this growing market into the city's transportation system. Similarly, existing Safe Routes to Schools programs are being enhanced and expanded by leveraging the Metropolitan Transportation Commission's regional Safe Routes to School program.

Linked to ongoing development efforts, the TIP includes significant new transportation infrastructure to support planned growth in the southeast sector of the City, particularly SOMA, Mission Bay, Bayview/ Hunters Point, Candlestick Point, and the San Francisco/San Mateo county line. In addition to the major transit investments mentioned above, the 2013 TIP contains a number of additional projects that would improve mobility for this sector, including local and arterial road upgrades, bus route extensions, transit capacity improvements, and new transit stations.

Many smaller projects in the TIP would be implemented in various locations throughout the city, including intelligent signal timing and management projects, street resurfacing projects, curb ramps, and numerous traffic calming projects. In addition, the 2013 TIP provides funding for projects that promote safety and connectivity for pedestrians, bicyclists, and transit riders, such as the 24<sup>th</sup> Street BART Plaza Pedestrian Improvement project, upgrades to the Marina Green Bicycle and Pedestrian Trail, and other major corridors for walking and bicycling, and accessible pedestrian signals.

The TIP includes a number of projects that help preserve and enhance our city's basic transportation infrastructure. For instance, it shows significant funds for the ongoing replacement of the SFMTA vehicle fleet, which serves approximately 700,000 daily passengers, more than any other Bay Area transit system. The SFMTA's vehicle acquisition and rehabilitation program, overhead line and rail replacement program, and facilities improvement program will help provide better, more reliable service to its passengers. The TIP also includes similar critical rehabilitation and upgrade projects for regional transit operators that serve San Francisco, including the Bay Area Rapid Transit District (BART) and Caltrain.

The County looks forward to working with our project partners to bring these and other projects to fruition to improve the quality of life in our city and the Bay Area.

## San Mateo County TIP Projects

Based on ABAG Projections 2009, by year 2035, San Mateo County's population will be 893,000. About one quarter of the county's 286,720 acres are urban, and the remaining three-quarters are primarily rangeland or forest. The urbanized area is concentrated in the vicinity of US Highway 101 and Caltrain corridors. The primary routes to the agricultural and open space coastal areas are State Route 92 (SR 92) from San Mateo and State Route 1 (SR 1) from Pacifica. Eighty-five percent of the employed county residents drive to work and 7 percent take bus or rail transit.

Emphasized transportation projects within San Mateo County include the following:

### Roadway Projects

- **US 101 and Interstate 280 corridors** — The major north-south artery in San Mateo is US Highway 101 (Bayshore Freeway). Approved State Transportation Improvement Program (STIP) funded the construction of auxiliary lanes on US 101 from the Santa Clara County line to Marsh Road (currently under construction), which also received Proposition 1B Corridor Mobility Improvement Account (CMIA) funds. County share of STIP funds has also been programmed for the US 101/Willow Road interchange improvement and the US 101/Broadway interchange improvement. San Mateo County has the vision to complete auxiliary lanes along the entire US 101 corridor and part of the Interstate 280 corridor in the northern part of the county. Various interchange improvements are also under consideration. Due to the limitation to expansion, most improvements in this corridor will be for improved operations and management of the existing system. Ramp metering has been implemented on the portion of the US 101 corridor south of SR 92 with a target to complete ramp metering along the entire San Mateo US 101 north of SR 92 to the county line. Ramp metering along the portion of Interstate 280 north of I-380 has been completed.
- **SR 92 corridor** — Projects focusing on the Route 92 corridor include operation improvements at the Route 92/ Route 82 (El Camino Real) interchange, and operation improvements for the US 101/ Route 92 interchange.
- **SR 1 corridor** – Highway 1 projects include operational improvement between Fassler Avenue and Westport Drive in Pacifica, and a bridge replacement project at San Pedro Creek in Pacifica.
- **Intelligent transportation system (ITS) improvements** and the San Mateo County Smart Corridor project are the County's highest priority projects included in the 2013 TIP. The San Mateo County Smart Corridor project implements signal upgrade, signal coordination, closed circuit television cameras, electronic message signs, vehicle detection systems, as well as other communication systems to manage routine traffic and traffic due to major incidents along El Camino Real and local arterials near US 101. The Smart Corridor project began construction in 2012.

### Transit

- **Caltrain State of Good Repair Program** — There are a number of projects with the goal of more efficient and reliable railroad operation. These encompass replacing and rehabilitating track and related civil structures, and signal and communication equipment that have reached the end of their useful lives. In addition, the state-of-good-repair program also includes station rehabilitation and improvements, ongoing rehabilitation of

the existing Caltrain rolling stock and evaluating the entire route to ensure that the rail system is maintained in a state of good repair and is kept in good working order.

- **Caltrain Electrification Program** – The program will electrify the Caltrain railroad corridor with an overhead contact system that will supply power to electric trains. Caltrain is also proposing to run Electric Multiple Units (EMUs) on its right of way once the railroad is electrified. Once operational, electric trains have better performance than diesel-powered trains, consume substantially less energy, and will result in reduced emissions and reduced noise.
- **Caltrain Modernization** – Caltrain is working closely and has entered into an agreement with the California High Speed Rail Authority (CHSRA) to implement closely-related projects that will benefit both Caltrain and CHSRA. The agreement specifies projects that increase capacity and ensure the sustainability of the Caltrain commuter rail system and will be implemented as a joint program along with the delivery of high speed rail service between San Jose and San Francisco. Besides the Caltrain Electrification Program, these projects include a new signal system will be put in place by 2015. The new signal system will include positive train control (PTC) and additional features that will improve the performance and safety of commuter rail operations. In an emergency, brakes will automatically be applied in the vehicles to protect against potential incidents. PTC is mandated for all rail systems in the U.S. by 2015. Furthermore, terminal capacity improvements are also included in the joint program.
- **Rolling Stock Replacement** – The 2013 TIP includes funding for the replacement of locomotives and rail cars for Caltrain and the replacement of fixed route bus and paratransit fleets for SamTrans. For Caltrain, the replacement of existing locomotives and passenger rail cars that will be at the end of their useful life will coincide with the Caltrain Electrification Program. These vehicles are proposed to be replaced with EMUs, discussed above. The SamTrans revenue vehicle fleet will also be replaced as the vehicles reach the end of their useful lives. As part of SamTrans' on-going sustainability efforts, the agency will evaluate, with each sub-fleet replacement, whether to procure clean technology vehicles. Both financial and technical feasibility will be key factors in such consideration.
- **Dumbarton Rail Corridor** – The Peninsula Corridor Joint Powers Board is managing the Dumbarton Rail Corridor project on behalf of a consortium of agencies, including the Alameda County Transportation Commission, San Mateo County Transportation Authority, and the Santa Clara Valley Transportation Authority. This project would rehabilitate existing rail infrastructure, procure rolling stock, and commission rail transit service over the Dumbarton Bridge, between communities in the East Bay and the Peninsula. The project team is continuing its work on the Draft Environmental Impact Statement/Environmental Impact Report (DEIS/DEIR), and is working on identifying a Locally Preferred Alternative (LPA) that is financially constrained, in addition to identifying interim bus enhancements for the corridor.

## Alternative Modes of Transportation

The San Mateo County 2013 TIP includes funding for pedestrian enhancement projects, bicycle route improvement projects, and safe routes to school educational projects in various locations throughout San Mateo County. These projects promote alternative transportation modes and improve pedestrian and bicyclists safety. Example projects include transit accessibility improvements for bicyclists and pedestrians at transit stations and an improved countywide bicycle network.

# Santa Clara County

## Santa Clara County TIP Projects

As of January 1, 2010 Santa Clara County's population was approximately 1.8 million, making it the largest of the nine Bay Area counties. The county has 15 incorporated cities, including San Jose, which is the third largest city in California, following Los Angeles and San Diego. Santa Clara continues to be the larger of the MTC region's two major employment centers, and attracts workers from most of the Bay Area, as well as the non-MTC counties of Merced, Monterey, San Benito, San Joaquin and Santa Cruz.

Santa Clara County enjoys a relatively balanced jobs/housing split and county residents fill roughly 80% of Santa Clara County's jobs. Significant and continuing housing construction over the last three years is causing that percentage to rise. However, the scale of the county's economy makes the relatively small import percentage translate into hundreds of thousands of daily commute trips.

Within Santa Clara County, local bus, express bus, and light rail service is provided by the Santa Clara Valley Transportation Authority (VTA). Caltrain, Altamont Commuter Express (ACE), and Amtrak's Capitol Corridor provide regional passenger rail services. Major freeways include SR-17, SR-85, SR-87, US-101, I-280, I-680 and I-880. In addition, Santa Clara County is unique among California counties in that the County owns and operates its own expressway system.

Santa Clara County has a number of improvements to its transportation system planned and included in the 2013 TIP. Major transportation projects programmed in the 2013 TIP include the BART - Warm Springs to Berryessa Extension, funded with State Transportation Improvement Program (STIP), Federal Transit Administration Section 5309, and local sales tax funds. The county has also received substantial state funding, such as Proposition 1B Corridor Mobility Improvement Account (CMIA) funds, to improve the county's highways. Auxiliary lanes on US-101, and interchange improvements at I-880/280 Stevens Creek Boulevard and US-101 Capitol Expressway are examples, with the latter two scheduled to begin construction in mid-2012. In addition to state funds, Santa Clara County also uses federal funds for the improvement and maintenance of its local streets and roads network. The county has access to its local transportation sales tax measure, which is used for transit projects as well as leveraging state and federal funds. To meet both internal and external travel demands Santa Clara County has developed multiple transportation investment strategies. The projects included in the 2013 TIP reflect both internal and gateway transportation investments in the county's roadway, transit and bicycle networks. Alternative transportation investments promoting bicycling and walking include the Guadalupe River Trail in San Jose (funded through Federal Transportation Enhancement funds), and various Safe Routes to School projects throughout the county.

# Solano County

## Solano Comprehensive Transportation Plan Consistency

The STA developed Solano County's 2013 TIP in coordination with the seven cities and the County of Solano. The projects included in the 2013 TIP collectively provide mobility, reduces congestion, and ensures travel safety and economic vitality to Solano County. This is consistent with the STA's Solano County Transportation Plan's goals and objectives, including:

- Identify a transportation system that supports the existing and planned land uses of Solano County's seven cities and the County of Solano.
- Maintain regional mobility while improving local mobility.
- Assess projects and programs based on their ability to balance the goals of economy, environment and equity.
- Encourage projects and programs that maintain and use existing systems more efficiently before expanding infrastructure.

## Solano County 2013 TIP Narrative

### Roadway Projects

The Solano County TIP includes major improvement projects along the I-80 and State Route (SR) 12 Corridors. The projects identified on the I-80 corridor include large capital projects related to the I-80/I-680/SR-12 Interchange and the Eastbound Cordelia Truck Scales Relocation project. In addition, the I-80 corridor includes Express Lane conversion in Fairfield and construction in Vacaville. The SR-12 corridor includes another major capital investment project related to the SR-12 Jameson Canyon Widening in the west between I-80 in Solano County and Napa County.

The Jepson Parkway Project with its three unique phases is also included in the 2013 TIP. The Jepson Parkway Project is a multimodal route to allow a route for local traffic to avoid traveling on I-80. Jepson Parkway travels through the cities of Fairfield, Suisun City, Vacaville and portions of unincorporated Solano County adjacent to Travis Air Force Base. The Jepson Parkway Project continues to be a priority project for the STA and its member agencies. STA anticipates to have the first phase constructed by 2015.

The Solano County TIP also consists of a number projects related to maintenance, safety improvements and rehabilitation of local streets and roads. This includes roadway improvement projects that provide better and safer access to Travis Air Force Base.

### Transit

Solano County currently has six transit operators, which includes the County of Solano's intercity paratransit service. The 2013 TIP includes intermodal transit centers, transfer facilities and bus shelter infrastructure improvements as well as construction of a rail station in Fairfield and a maintenance facility for ferry service in Vallejo.

The Fairfield Transportation Center (FTC) Phase 3 and the Vacaville Intermodal Station Phase 2 were originally added to the 2011 TIP and remain in the 2013 TIP. The new FTC Phase 3 project involves preliminary engineering and environmental documents for an expansion to the

transportation center's park and ride lot to a parking structure. The current FTC lots are operating at capacity with patrons accessing Express Bus service on I-80, I-680 or carpooling and vanpooling. Vacaville's Intermodal Station was completed in 2011 and future parking lot expansion preliminary engineering is underway.

#### Alternative Modes

Alternative modes projects consist of bicycle, pedestrian and carpool/vanpool incentive programs. The STA continues to support the Solano Safe Routes to School Program (SR2S) and Solano Napa Commuter Information Rideshare Program. The SR2S program promotes walking and bicycling through education, incentives, and capital improvements. The Rideshare Program promotes transit and commuter incentives such as vanpools and carpools.

The 2013 TIP also includes the following countywide significant bicycle and pedestrian projects:

- The City of Dixon's West B Street Bicycle and Pedestrian Undercrossing Project
- The City of Suisun City's Grizzly Island Trail
- The City of Vacaville's Ulatis Creek Bike Path
- Phase 5 of the County of Solano's Vacaville Dixon Bike Route
- The City of Vallejo's Priority Development Area (PDA) project, "Vallejo Downtown Streetscape"

The City of Dixon's West B Street Bicycle and Pedestrian Undercrossing Project is a safety project adjacent to the future City of Dixon Capitol Corridor train station site. Currently, pedestrians and bicyclists traverse a Class I at-grade rail crossing. The City of Suisun City's Grizzly Island Trail is a planned Class I facility adjacent to SR 12 in Suisun City. The project closes a gap of approximately 1 mile on the south side of SR 12 for pedestrians and bicyclists. The City of Vacaville's Ulatis Creek Bike Path extends an existing path from their Allison and Ulatis PDA to the planned Jepson Parkway at Leisure Town Road. Phase 5 of the County of Solano's Vacaville Dixon Bike Route addresses the final segment of a Class 2 bike route network connecting the City of Vacaville to Dixon and on to Yolo County. The City of Vallejo's PDA project is the first Solano County PDA project to be originally funded with Transportation for Livable Communities (TLC) County capital funds. The PDA project will enhance pedestrian connections from the future intermodal transit facility to Downtown Vallejo.

## **Final Summary**

The STA's 2013 TIP is a balanced mix of roadway projects, transit projects, and alternative modes projects. The projects included in the 2013 TIP will help address the current and future transportation needs in Solano County. These projects are consistent with the Solano CTP and have been identified as part of the STA's Routes of Regional Significance, Transit Centers of Regional Significance and or included in a CTP subsidiary plan (e.g., Countywide Bicycle Plan and Countywide Pedestrian Plan).

# Sonoma County

# Sonoma County

## Sonoma County TIP Projects

Sonoma County is the largest of the four North Bay counties by area — it covers over one million acres of land and has a population of 483,878.

Sonoma County has a relatively balanced jobs/housing split with over 80% of its residents working within the county. The economy is based on a diverse mix of agriculture, manufacturing, high tech & telecommunications, and the service sector.

Transportation ranks as one of the key issues among Sonoma County residents. The transportation system in the county includes several state highways, 2,300 miles of streets and roads, four transit providers. Sonoma County also has an approved sales tax measure, which helps to fund key multi-modal transportation projects within the county. Sonoma and Marin Counties also share a sales tax measure to fund the Sonoma Marin Area Rail Transit (SMART) project on a section of the Northwestern Pacific railroad line, which is in public ownership.

## Sonoma Comprehensive Transportation Plan Consistency

The SCTA developed Sonoma County's TIP in coordination with the nine cities and the County of Sonoma. The projects included in the 2013 TIP serve to meet the goals the 2009 *Comprehensive Transportation Plan of Sonoma County*:

- Maintain the System
- Relieve Congestion
- Reduce Emissions
- Plan for Safety and Health

### Roadway

There are several projects in the 2013 TIP that will continue widening of Highway 101 in Sonoma County for High Occupancy Vehicle (HOV) Lanes from the Marin County line to the Town of Windsor, which has been a longstanding need for local and interregional travel. The Highway 101 projects collectively serve to reduce congestion, maintain the current facility, upgrade the facility to current safety standards, and reduce emissions by encouraging carpooling and use of express bus service. The Highway 101 projects also address local accesses across Highway 101 with interchange improvements, widening of local streets and the addition of sidewalks and bike lanes. There are also several local asphalt maintenance projects needed to protect existing infrastructure included in the 2013 TIP. Also included are bridge replacement projects, needed for seismic safety, maintenance, and expansion of local roadways.

### Transit

Sonoma County currently has four transit operators. Sonoma County Transit serves the entire county and Golden Gate Transit serves the 101 Corridor as far north as Santa Rosa. The cities of Petaluma and Santa Rosa have transit systems that serve their respective cities. Sonoma County also shares a rail transit district with Marin County that will be operational by 2015. The 2013 TIP contains projects that will allow for the installation of clean natural gas fueling station and purchase clean air vehicles for the transit fleets. Transit facilities including metropolitan

transportation hubs and maintenance yards will receive upgrades. Bus stops will be improved in multiple locations. Sonoma Marin Area Rail Transit (SMART) district will be upgrading rail lines, improving street crossings and building rail stations for operation beginning as early as 2015.

### **Alternative Modes**

Sonoma County Transportation Authority is working with the County Department of Health Services to implement a Safe Routes to Schools program that is receiving federal funds to add 18 schools to the existing county program. The program seeks to educate school children on safe biking and walking practices, and encouraging school children to use bicycling and walking as an alternative mode of transportation.

SCTA has one climate initiative project that develops real-time ridesharing with smart phone application technology. The program encourages ridesharing through cell phone technology and allows users to rate both drivers and riders, in order to improve the system in real time.

The SCTA also administers funds to implement student pass subsidy programs, and free ride trip reduction projects to reduce the number of single occupant vehicles on city streets and enhance air quality.

Several jurisdictions have bicycle and pedestrian improvement projects that will extend Class A bike paths, or create new pathways. Additionally, proposed pedestrian improvements will enhance walkability inside city centers and along waterways and coastline. Examples include the SMART multi-use path and bicycle and pedestrian enhancements on Old Redwood Highway in Windsor, both partially funded with Federal Transportation Enhancement funds.

### **Summary**

The SCTA's 2013 TIP is a balanced mix of roadway projects, transit projects, and alternative modes projects. The projects included in the 2013 TIP will help address the current and future transportation needs in Sonoma County. These projects are consistent with the Sonoma Comprehensive Transportation Plan.

# Multiple Counties

## Multiple Counties

This section contains projects that involve multiple counties, projects sponsored by MTC and Caltrans lump-sum projects.

Caltrans lump-sum projects include projects funded through the State Highway Operations and Protection Program (SHOPP), which maintains the state highway system, and Highway Safety Improvement Program (HSIP), which improves safety on state highways. These projects are not necessarily located in one county alone, and generally involve multiple counties or locations.

# Regional Projects

## Overview

The Association of Bay Area Governments (ABAG) and the Metropolitan Transportation Commission (MTC) track and forecast the region's demographics and economic trends to inform and guide Plan Bay Area investments and policy decisions. Between 2010 and 2040, the nine-county San Francisco Bay Area is projected to add 1.1 million jobs, 2.1 million people, and 660,000 homes, for a total of 4.5 million jobs, 9.3 million people, and 3.4 million homes. These figures translate to more drivers on the Bay Area's roads and riders on both local and regional transit systems. This increase in the use of the region's transportation infrastructure will necessitate greater coordination to ease the flow of riders and traffic between destinations.

In addition to better coordination among systems, these projected increases in population and employment raise concerns about the environmental impact of transporting these individuals and the goods that they will need. Senate Bill 375 mandates per-capita greenhouse gas (GHG) target achievements for years 2020 and 2035 as established by the California Air Resources Board. Plan Bay Area achieves the greenhouse gas emissions reduction target required by state law through a more efficient land use pattern, key transportation investments, and initiatives such as accelerated electric vehicle deployment. It also achieves the housing target required by state law to provide housing for all of the region's population over the next three decades, relying on local communities' support for policies that direct the lion's share of housing growth into Priority Development Areas. Plan Bay Area not only meets but exceeds its GHG emissions reduction target. By 2040, the typical Bay Area resident is expected to reduce his or her daily transportation carbon dioxide emissions by 18 percent compared to 2005 conditions.

While MTC has considered the effects of transportation investments on GHG emissions in prior regional transportation plans, Plan Bay Area is the first regional effort with an aggressive and achievable emission reduction goal. By accelerating efforts to emphasize infill growth and to boost funding for public transit, the plan represents a bold step for the region in this era of climate change. The 2013 TIP's project programming is consistent with and supports the goals of Plan Bay Area.

## Regional TIP Projects

To address the issues facing the Bay Area as a whole, certain regional projects and programs have been included in the 2013 TIP. Among these are funding for planning activities undertaken by regional entities such as MTC, ABAG, and BCDC and marketing to support the region's transportation operations. Other projects in this area are as follows:

*Clipper<sup>sm</sup>* – Clipper<sup>sm</sup> was introduced in the Bay Area to provide a consistent experience for riders across multiple transit systems. It is an all-in-one transit card that can currently be used on AC Transit, BART, Caltrain, Golden Gate Transit and Ferry, San Francisco Muni, SamTrans and VTA riders. The card may be customized to the user's travel preferences by loading passes, ride-books, discounted tickets or cash value. This may be done online, by phone, through Clipper<sup>sm</sup> Add Value machines or participating retailers, through an employee benefit program or automatically using the Autoload feature.

*511* – 511 provides information regarding transit, rideshare, traffic and bicycling information to users by phone or through the 511.org website. Callers to the 511 system can get estimated travel times for trips, traffic congestion updates, transit departure time predictions, carpooling and vanpooling information and other assistance. Users of the website are able to plan trips by transit or roads, view traffic maps, find carpool members, view bicycle maps and safety tips, and access other information.

*Safety* – Many projects in the 2013 TIP are aimed at increasing the safety of the Bay Area's highways. Activities such as bridge and pavement rehabilitation and highway shoulder widening projects help prevent accidents by addressing unsafe road conditions. Under its Incident Management Program, the Metropolitan Transportation Commission Service Authority for Freeways and Expressways (MTC SAFE), in conjunction with Caltrans and the California Highway Patrol, operates both the Call Box Program and the Freeway Service Patrol (FSP) in the Bay Area. The Call Box Program provides motorists experiencing breakdowns and flat tires with access to assistance 24 hours a day. The FSP is a fleet of 85 roving tow and service trucks deployed during peak travel times to clear accidents, assist motorists, and remove dangerous debris from freeways.

*Regional and Inter-Regional Freight Rail Projects* – The 2013 TIP includes a number of regional and inter-regional freight rail projects that will not only facilitate economic growth, but also aid in reducing greenhouse gas and PM emissions. The Port of Oakland's Outer Harbor Intermodal Terminal (OHIT) project aims to alleviate congestion and improve efficiency of Port operations. Similarly, the Port of Oakland will be studying options for greater rail connectivity between their facilities and the Central Valley. Finally, the Richmond Rail Connector project aims to improve both freight and passenger train efficiency in the corridor.

*Climate Initiatives Program* – Many measures are being taken to reduce greenhouse gas (GHG) emissions and/or to mitigate the effects of climate change as required by state and federal law. Such measures and programs include innovative grants for activities such as car/bike sharing and shore power for the Port of Oakland, Spare the Air Youth Program to educate and inspire youth to take alternate forms of transportation, Smart Driving Pilots to encourage more efficient driving techniques, and promotion of electric vehicles (EV) and EV infrastructure.

# Tollway Projects

## Regional Measure 1 Toll Bridge Program

In November 1988, Bay Area voters approved Regional Measure 1 (RM 1), which authorized a standard base auto toll of \$1.00 on all seven state-owned Bay Area toll bridges – the Antioch, Benicia-Martinez, Carquinez, Dumbarton, Richmond-San Rafael, San Mateo-Hayward and San Francisco-Oakland Bay bridges. The additional revenues generated by the base toll increase were designated for a number of bridge, highway, and transit improvement projects designed to reduce congestion on the bridges.

In 1998, the Metropolitan Transportation Commission (MTC), in its role as the Bay Area Toll Authority (BATA), assumed administration of these base toll funds as well as responsibility for overseeing the RM 1 toll bridge capital improvement program. Two RM 1 projects — the widening of the Benicia-Martinez Bridge and construction of the West Grand Avenue connector to the San Francisco-Oakland Bay Bridge — had, by then, already been completed by Caltrans, which continues to provide the engineering staffing for design and construction oversight of the projects, reimbursed by BATA.

The RM 1 projects overseen by BATA will cost approximately \$2.4 billion and are funded primarily by BATA toll funds. The projects and their status are as follows:

- New Carquinez Bridge (Open to traffic in 2003)
- New Benicia-Martinez Bridge (Open to traffic in 2007)
- Existing Benicia-Martinez Bridge Modified for Southbound Only Traffic (Completed in 2009)
- Major Rehabilitation of Richmond-San Rafael Bridge
  - Replacement of trestle and rehabilitation of fenders (Completed in 2005)
  - Resurfacing of bridge deck (Completed in 2006)
- Completion of Richmond Parkway (Completed in 2001)
- Widening of San Mateo-Hayward Bridge and eastern approach (Open to traffic in 2003)
- Improvements to the western approach to Dumbarton Bridge
  - Modifications to US 101/University Avenue interchange (Completed in 2004)
  - Widening of State Route 84/Bayfront Expressway (Open to traffic in 2004)
- Reconstruction of Interstate 880/State Route 92 Interchange (Completed in 2011)

## Toll Bridge Seismic Retrofit Program

Tolls on all state-owned bridges in the Bay Area include a seismic surcharge applied to the base toll. Administered by BATA, these toll funds are used in combination with other state and federal moneys to finance a multibillion-dollar toll bridge seismic retrofit program affecting the state-owned Bay Area toll bridges. Caltrans' engineering staff determines what retrofit work is needed on each bridge based on traffic uses, expected life of the bridge, cost of higher post-earthquake performance levels, and other considerations. Each retrofit is designed to a level that, at a minimum, will ensure that the bridge will remain standing in an earthquake.

When first conceived, the Toll Bridge Seismic Retrofit Program only identified seven of the nine state owned toll bridges to be in need of seismic retrofit – excluding the Dumbarton and Antioch Bridges. Further seismic vulnerability studies on those bridges determined the need for retrofit

based on current seismic standards. In 2009, Assembly Bill 1175 was signed to add these bridges to the program. Tolls were subsequently increased to cover the cost of these retrofits.

The \$9.4 billion Toll Bridge Seismic Retrofit Program is overseen by the Toll Bridge Oversight Committee – a committee composed of the executive directors of BATA and the California Transportation Commission and the director of Caltrans. The projects and their status are as follows:

#### **Toll Bridge Seismic Retrofit Program**

- Antioch Bridge — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2012)
- Benicia-Martinez Bridge (original 1962 span) — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2002)
- Carquinez (1958 eastbound structure) Bridge — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2002)
- Dumbarton Bridge — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2012)
- Richmond-San Rafael — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2005)
- San Francisco-Oakland Bay (west span) — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2004)
- San Francisco-Oakland Bay (west approach) — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2009)
- San Francisco-Oakland Bay (east span) — Construct new bridge (Under Construction, expected to open to traffic in 2013)
- San Mateo- Hayward — Strengthen or replace structural elements, add isolation and dampening features (Completed in 2000)

#### **Regional Measure 2 Toll Bridge Program**

On March 2, 2004, voters passed Regional Measure 2 (RM2), raising the toll on the seven State-owned toll bridges in the San Francisco Bay Area by \$1.00. This extra dollar is to fund various transportation projects within the region that have been determined to reduce congestion or to make improvements to travel in the toll bridge corridors, as identified in SB 916 (Chapter 715, Statutes of 2004). Specifically, RM2 identifies thirty-six capital and fourteen transit operating assistance projects and programs eligible to receive RM2 funding (California Streets and Highway Code Section 30914 (c) & (d)). The capital program totals \$1.5 billion in project investments to be implemented over time and the operating program is funded at up to 38% of annual revenues, or approximately \$44 million per year.

In accordance with the legislation as approved by the voters, the Bay Area Toll Authority (BATA) is the financial manager for RM2 funds, whose responsibilities include the preparation of financial plans, the issuance of debt financing, and the disbursement of funds to project sponsors. The Metropolitan Transportation Commission (MTC) is the program and project coordinator, whose responsibilities include reviewing project applications, programming and allocating funds to specific projects, and monitoring project delivery. In some cases, MTC also serves as the project sponsor, for the regional Transit Connectivity Study, as well as certain regional customer service projects, such as the Transit Commuter Benefits promotion, the Real Time Transit information program, and implementation of Clipper<sup>(sm)</sup>, formerly known as TransLink®.
